Maimuna M.

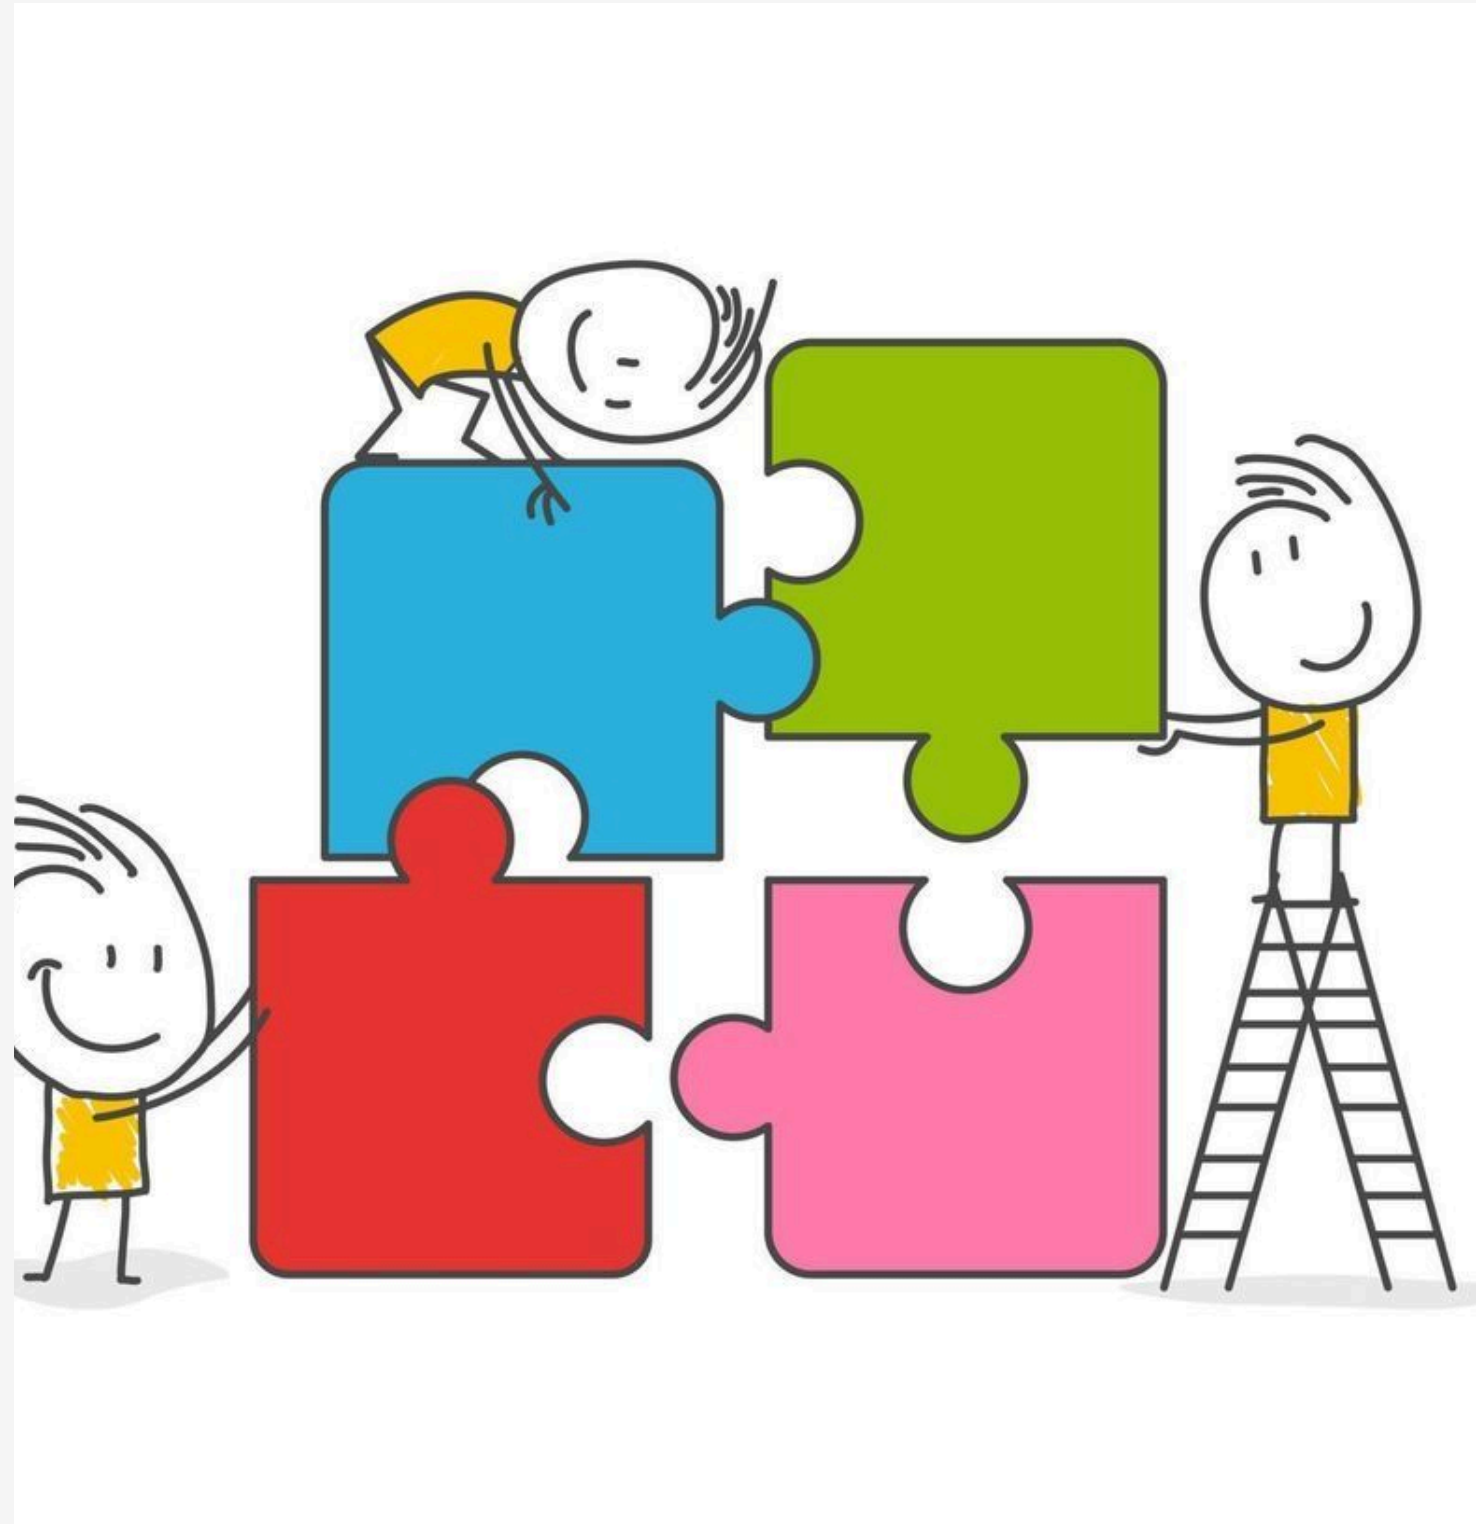

Problem Statement

New small businesses are trying to establish themselves.

Old small businesses are trying to keep up with the changing times.

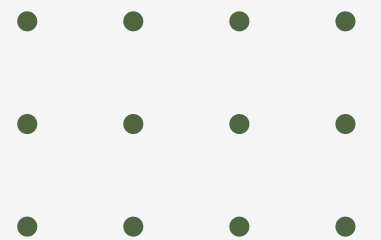

For all small businesses, finding support, adapting to a new generation, and creating community has been difficult.

Our Solution

STITCH uses an AI matching algorithm to allow small businesses to collaborate on events to attract new customers.

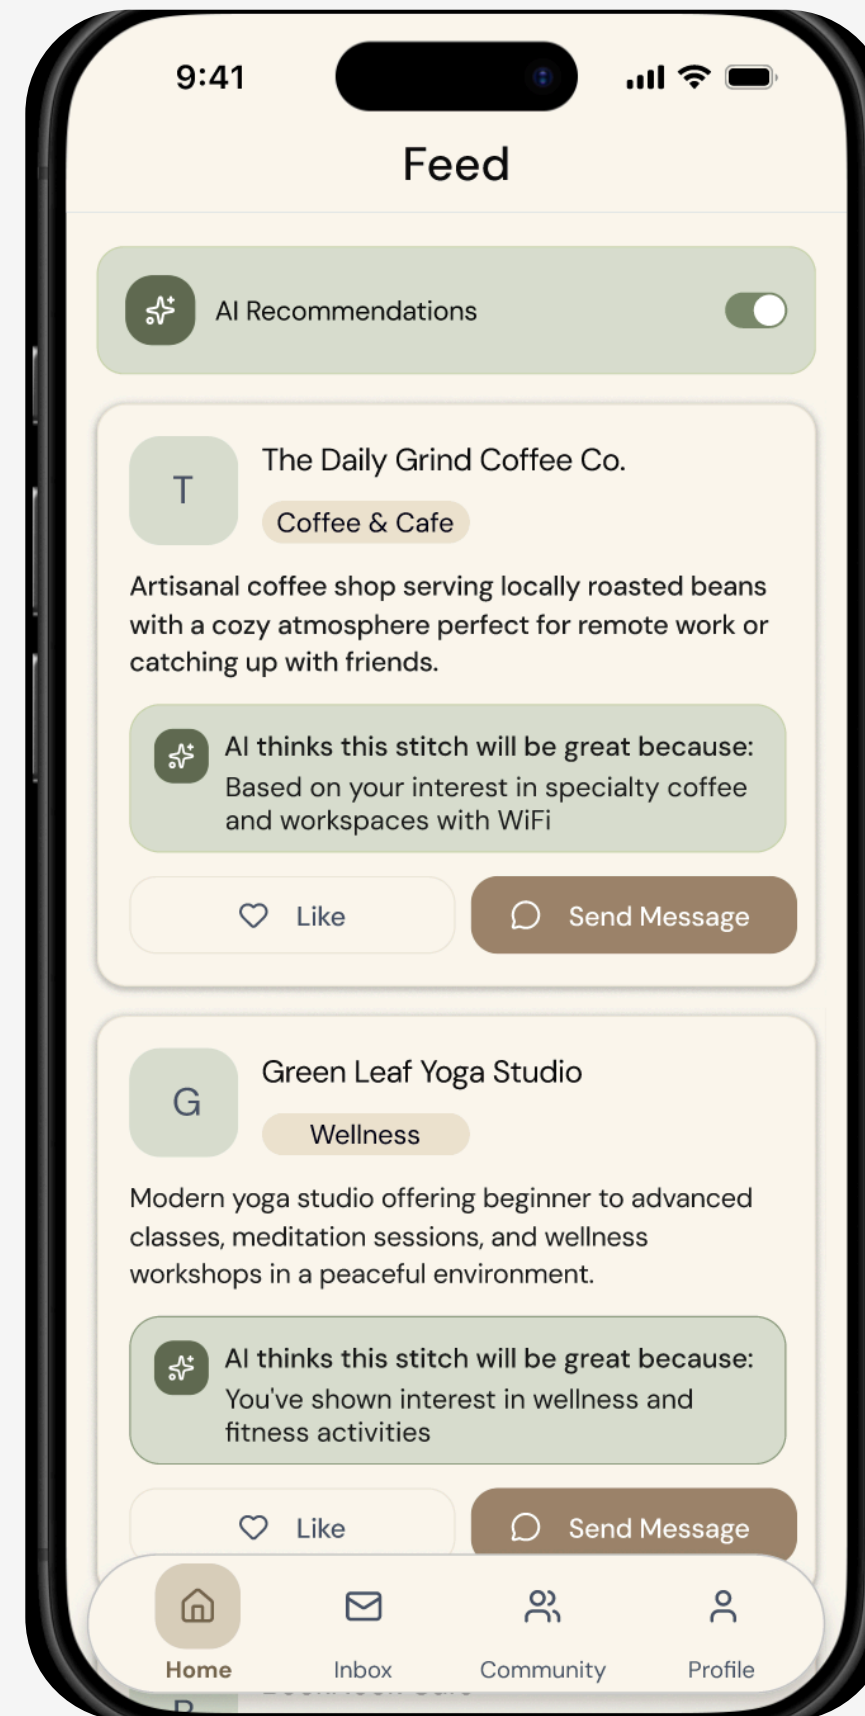

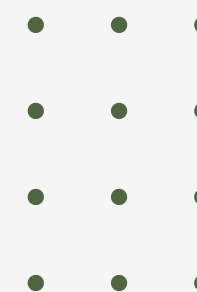

Values In Design

Value 1: Transparency

- User should understand the underlying details behind AI matches

website link

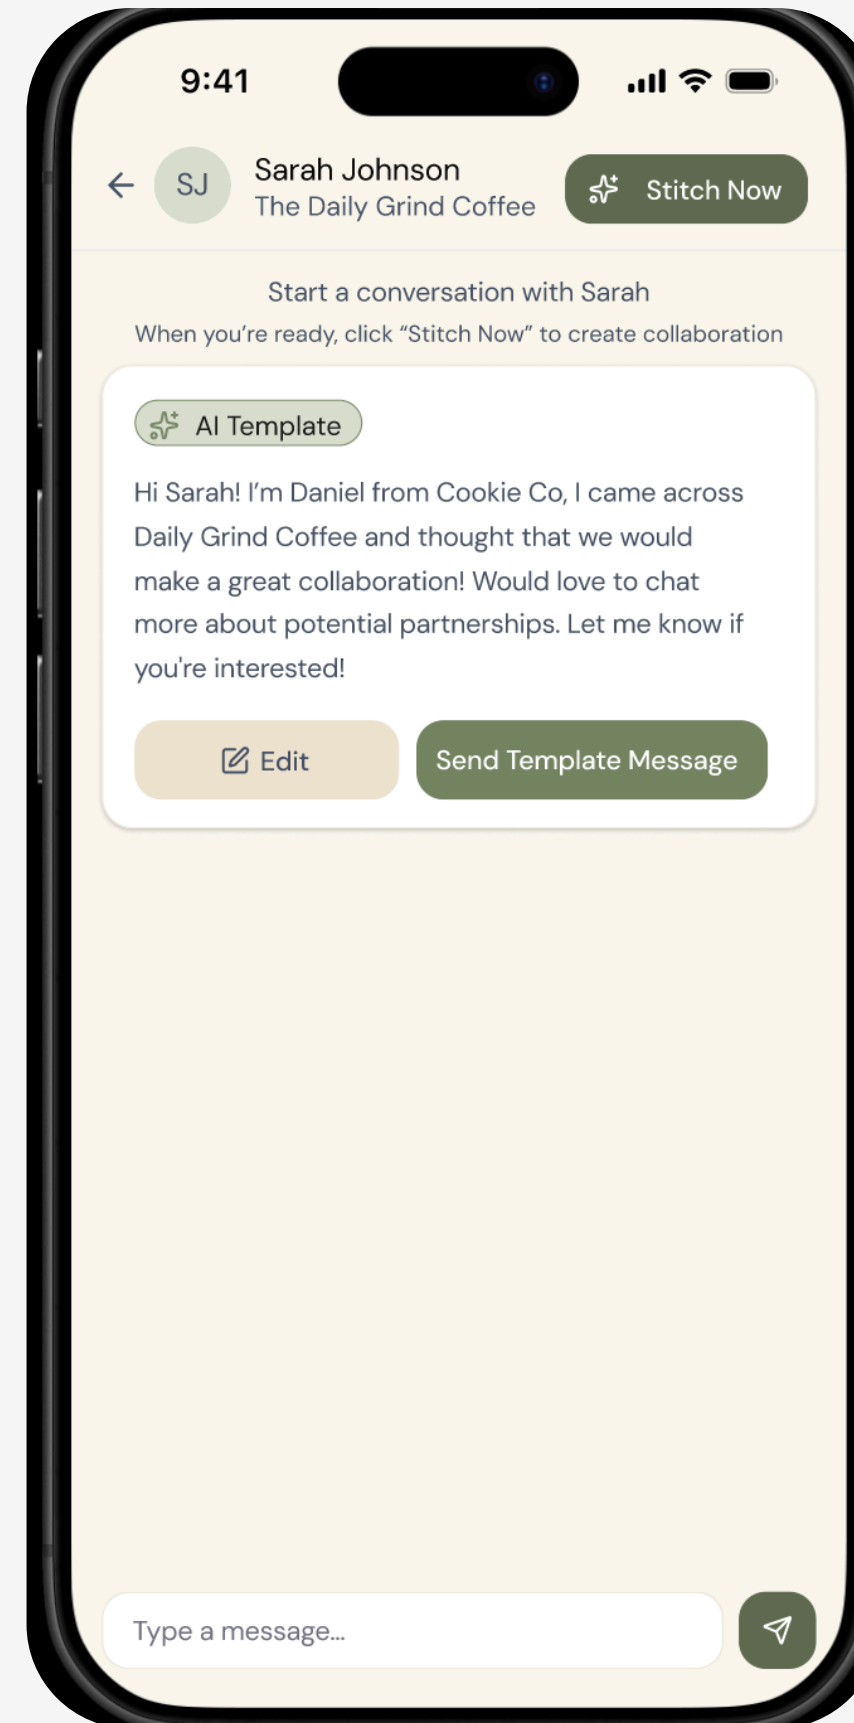

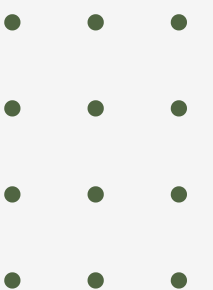

Values In Design

Value 2: Accessibility

- Every user, regardless of technical skill or background, can easily navigate and benefit from all platform features through intuitive, human-centered design

website link

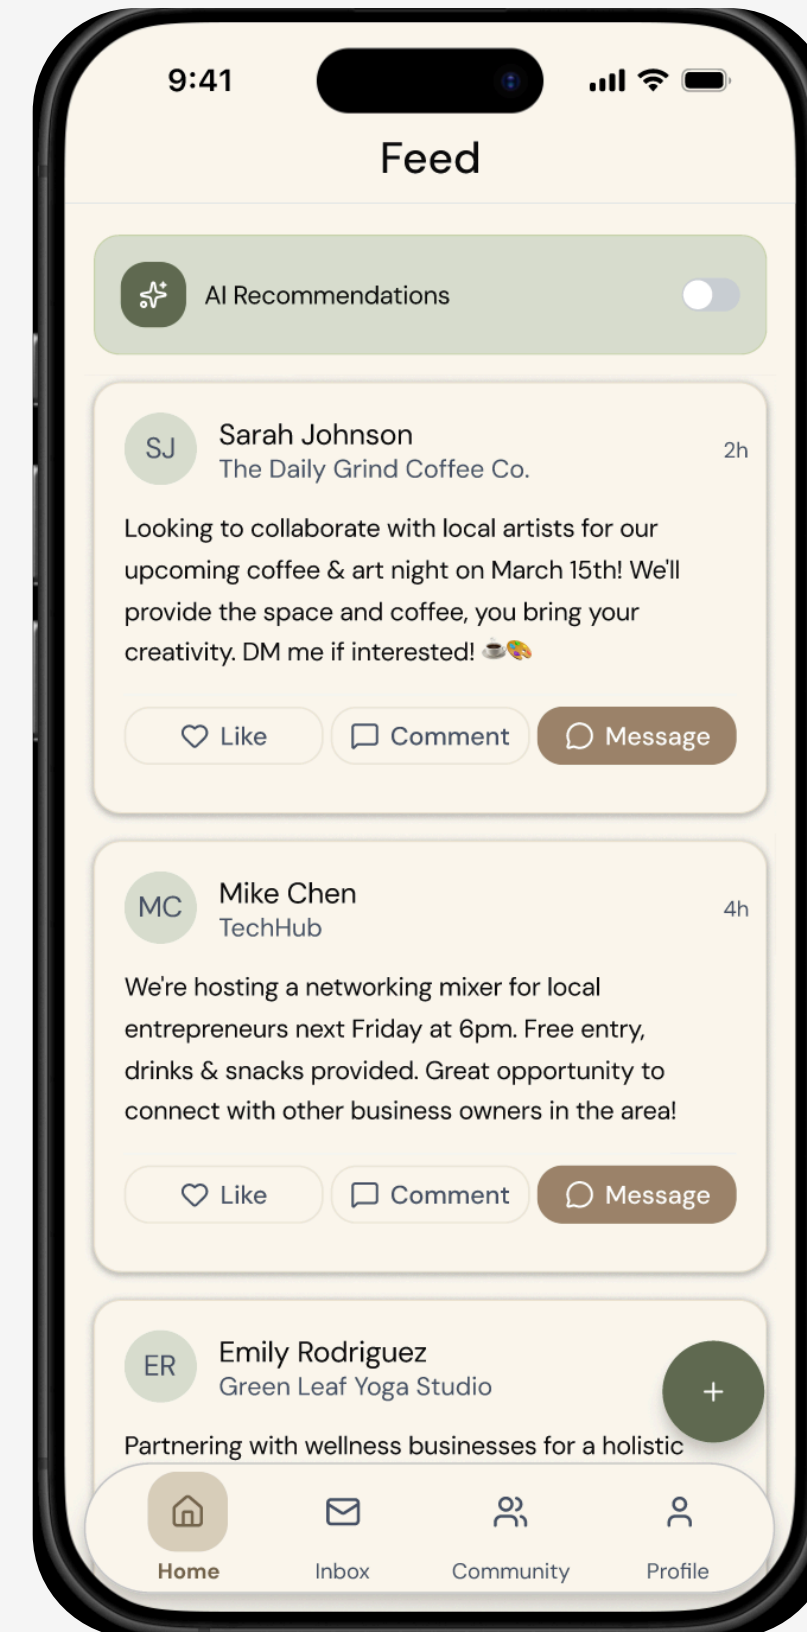

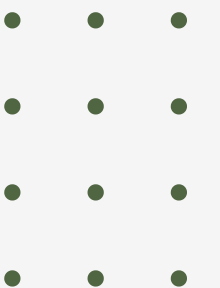

Values In Design

Value 3: Empowerment

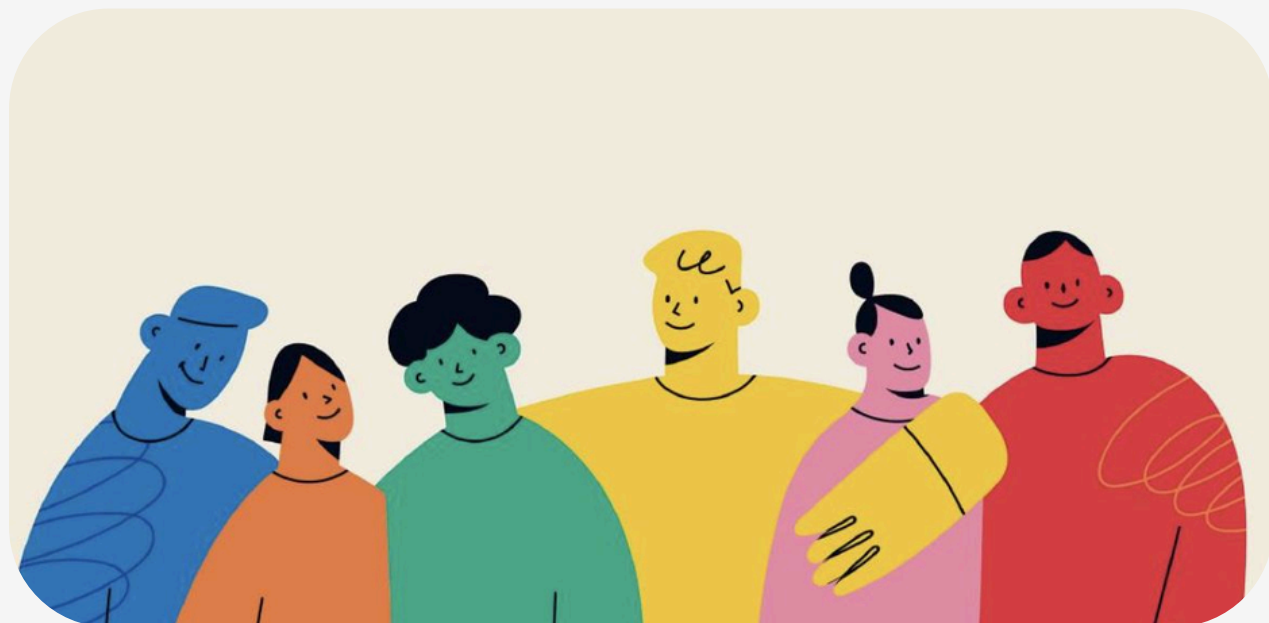

- We strengthen community by enabling members to support, learn from, and uplift one another, turning individual success into collective progress.

Tension In Values

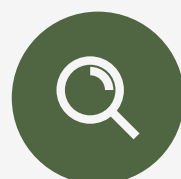

Transparency vs. Accessibility

Tension: Users should understand AI matching details versus every user can easily navigate features regardless of technical skill.

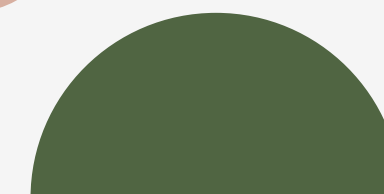

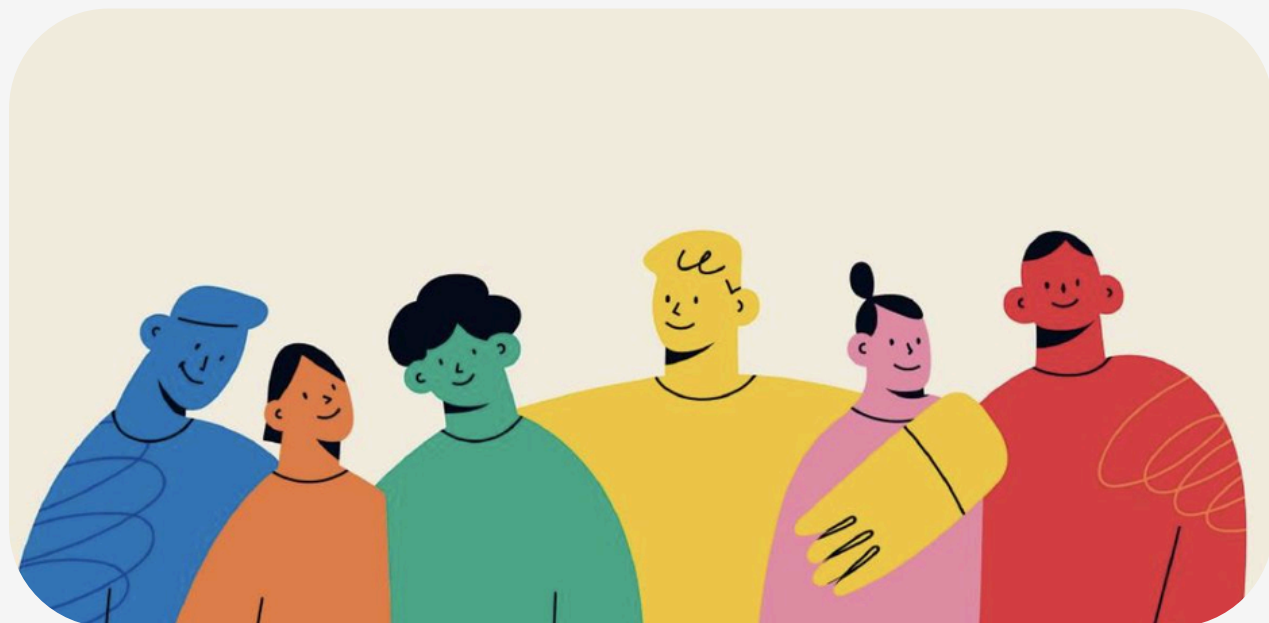

Why it's a tension: Full algorithmic transparency risks overwhelming non-technical owners, but oversimplifying reduces trust in recommendations.

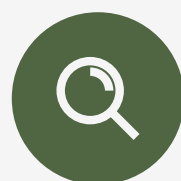

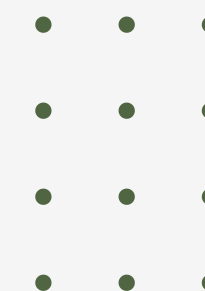

How Stitch addresses it: We show simplified AI matches with brief explanations for each match tag, providing transparency through information access.

Tension In Values

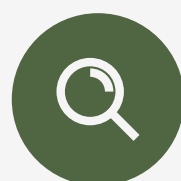

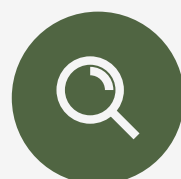

Accessibility vs. Empowerment

Tension: Easy navigation for all users versus enabling members to organize complex community-wide initiatives and sustained networks.

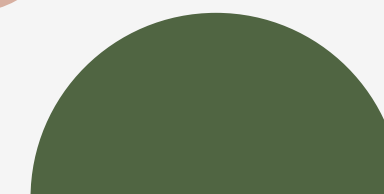

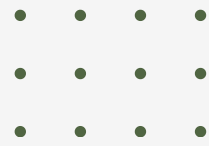

Why it's a tension: Maximum accessibility requires simplification, but true empowerment demands advanced features like bulk messaging and multi-business coordination.

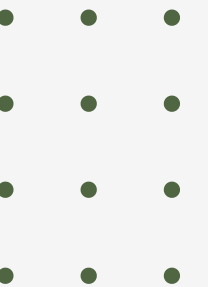

How Stitch addresses it: We provide progressive disclosure, simple default flows for new users, with advanced features such as “create a stitch” revealed as engagement deepens.

Tension In Values

Transparency vs. Empowerment

Tension: Users understand AI matching details versus fostering collective community progress where all businesses feel equal opportunity.

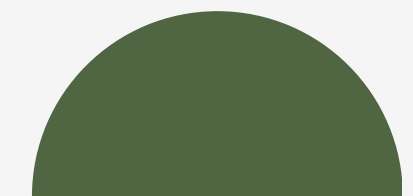

Why it's a tension: Full transparency about business matches could create unhealthy competition and hierarchies, but hiding information prevents users from understanding how to improve.

How Stitch addresses it: We provide transparency about the why behind individual matches without exposing comparative network-wide data or rankings.

Tension In Values

Tasks

Simple: message another small business

Start a conversation with Sarah
When you're ready, click "Stitch Now" to create collaboration

AI Template

Hi Sarah! I'm Daniel from Cookie Co, I came across Daily Grind Coffee and thought that we would make a great collaboration! Would love to chat more about potential partnerships. Let me know if you're interested!

Edit Send Template Message

Moderate: post an event to collaborate

Create a Stitch

Collaborating with:
Sarah Johnson
The Daily Grind Coffee Co.

Name of Event
Cookies x Coffee Networking Event

Describe your collaboration:
Come network with fellow professionals from all industries and enjoy some freshly baked cookies and brewed coffee!

Pick a Date
10/27/2025

Tip: A Stitch is a formal collaboration proposal. Once created, Sarah will receive a notification to review and accept your collaboration idea.

Cancel Create Stitch

Complex: collaborate on an event multiple times

Repeat Event?

Event:
Cookies x Coffee Networking Event

Would you like to make this a recurring event?
No thanks Yes, repeat it

How often should this event repeat?

Weekly
Every week ☐

Bi-weekly
Every 2 weeks ☐

Monthly
Once a month ☐

Quarterly
Every 3 months ☐

Save

Efficiency in business partner discovery.

measured by: time taken to send the first collaborative message to an AI-recommended business is < 2 mins.

Number of clicks to complete the send a message task.

design features to enhance goal:

Feature 1: Quick Action Cards on AI Recommendations such as "Message" and "Stitch Now" buttons.

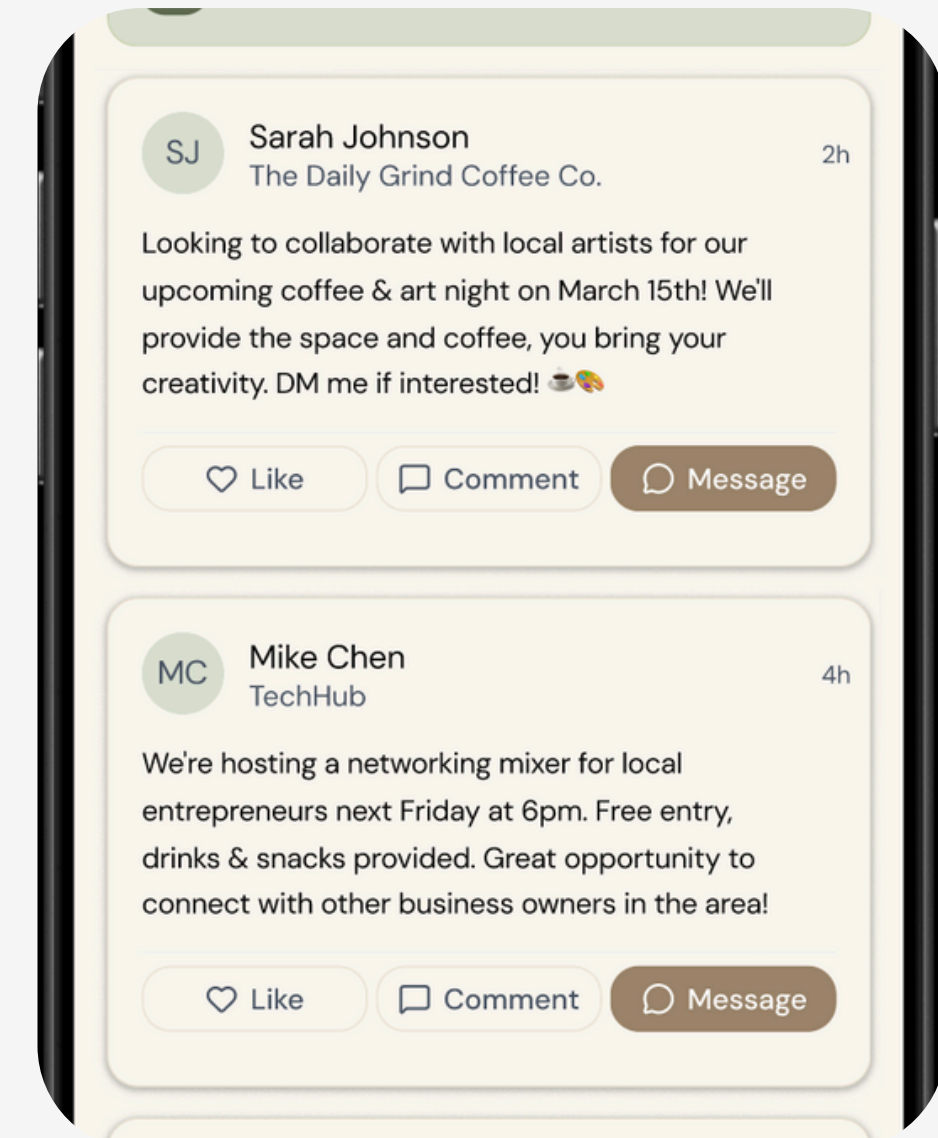

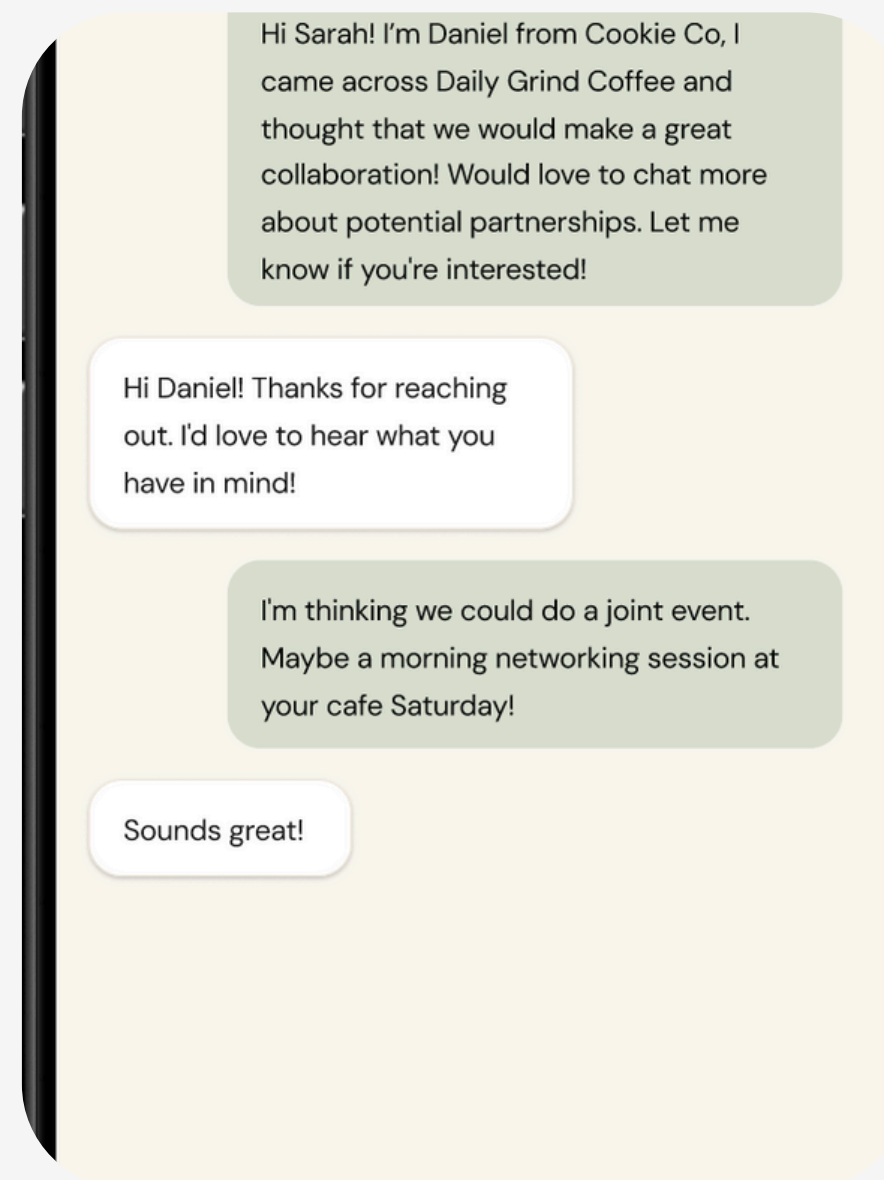

Feature 2: Smart Message Templates with Personalisation.

Feature 3: "Stitched Event" automatically added to community events tab.

Usability Goals & Measurements

website

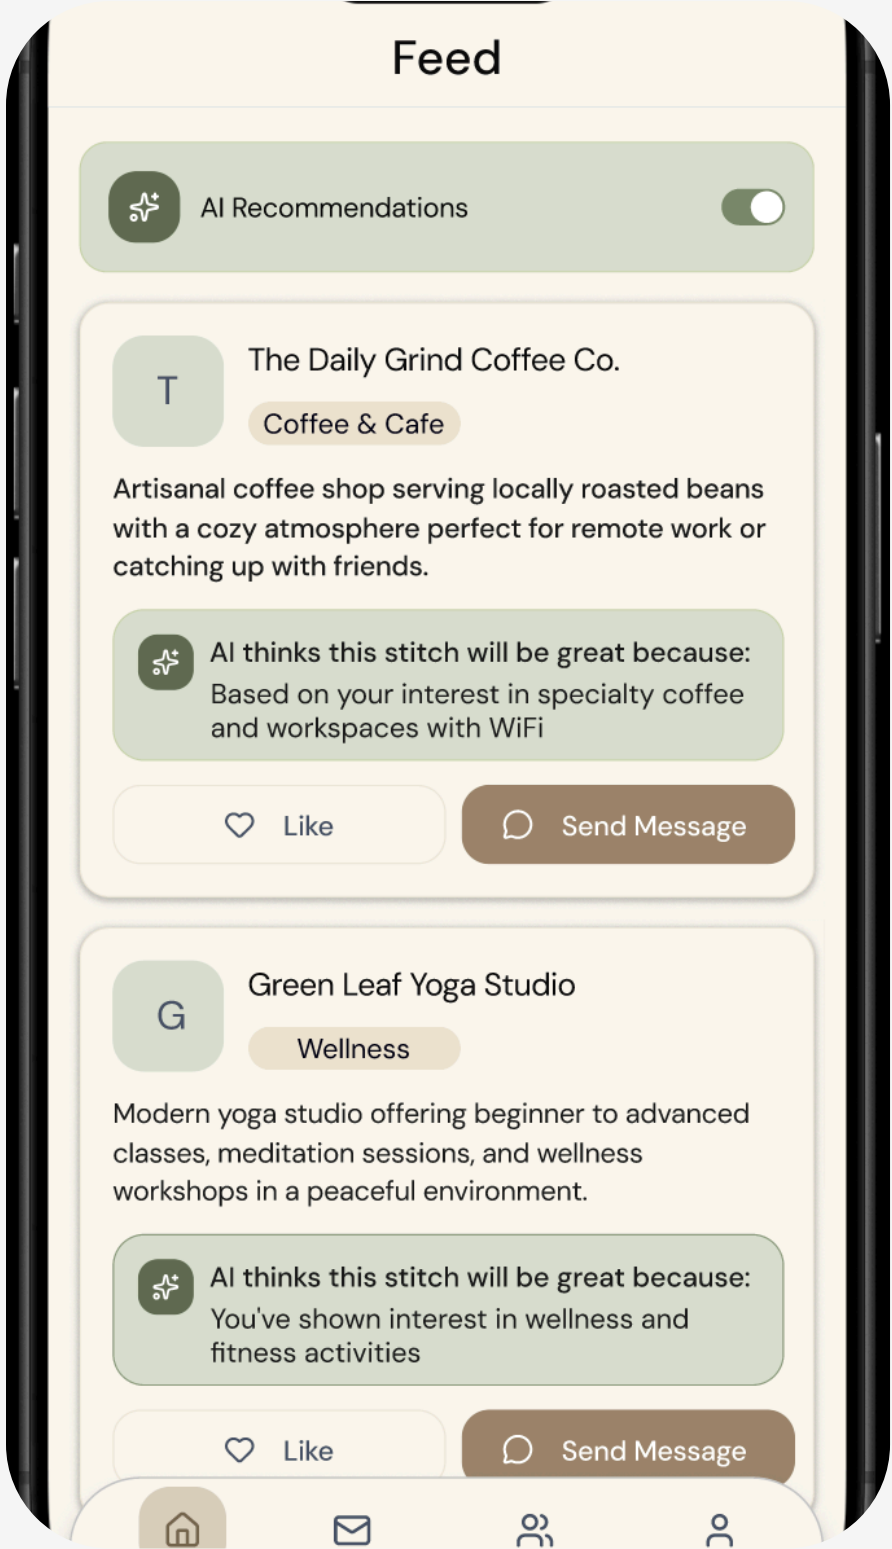

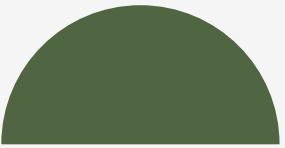

Clarity of AI matching

measured by:
comprehension success rate: the number of users who can correctly identify shared values between their business and the recommended partner after viewing the match card.

design features to enhance goal:
Feature 1: Match Explanation Card, “Why this AI recommendation”

Revised Interface Sketches

Design Change 1:

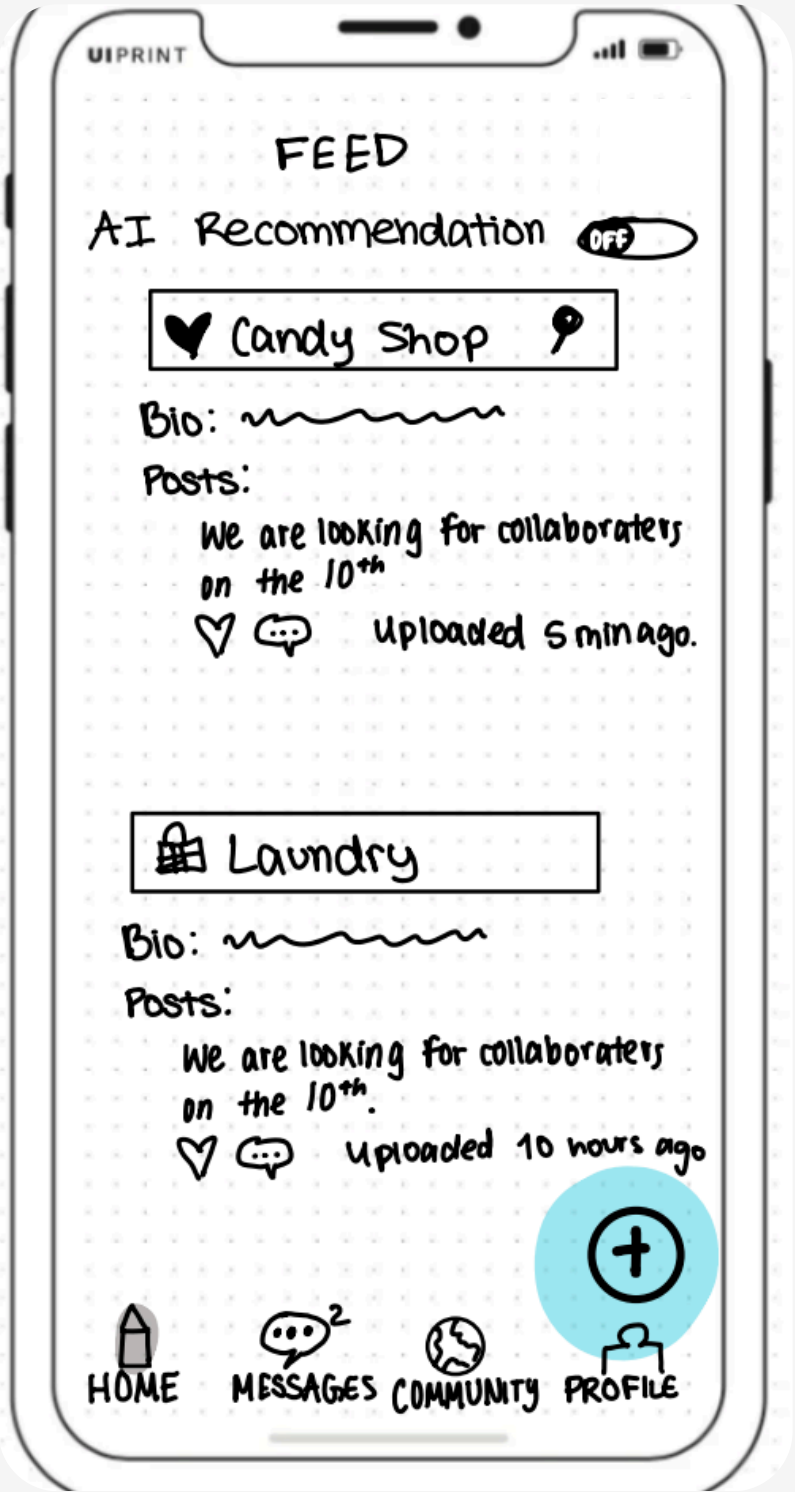

Home Page “+” Button

Before:

Feedback:

Design Change 1:

Home Page “+” Button

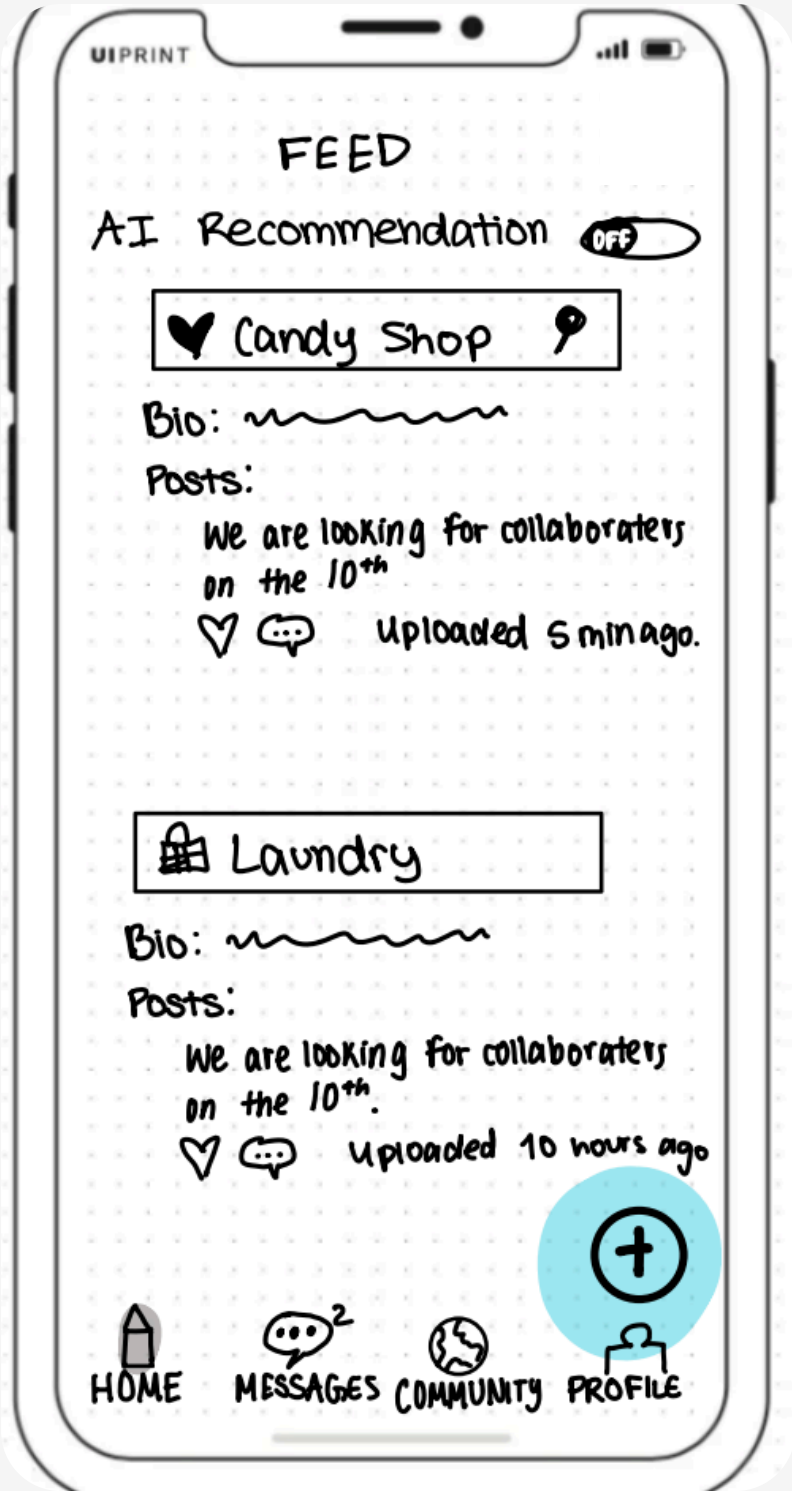

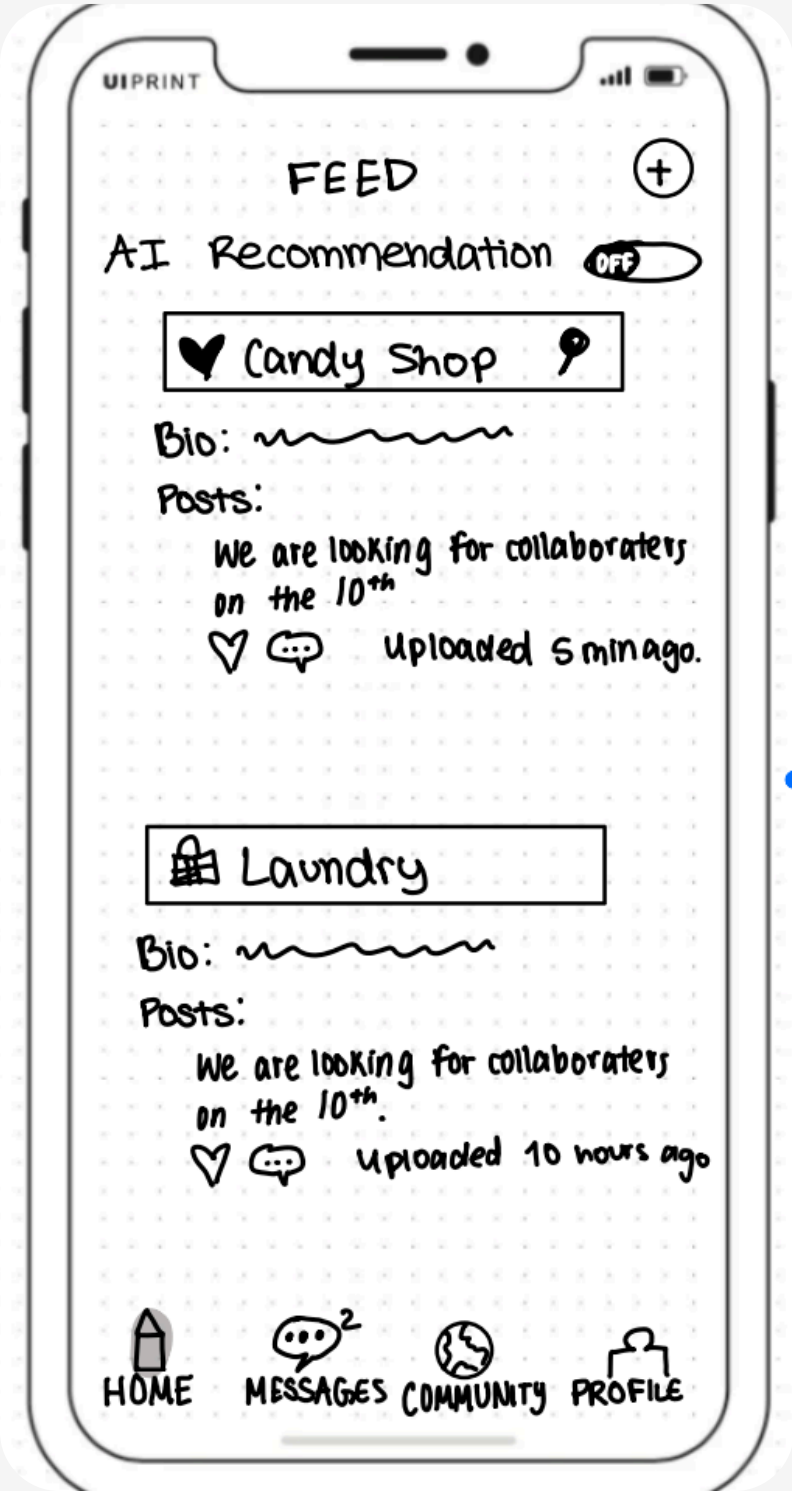

Changes Made:

Added a plus button to the feed page when AI recommendations are off.

Rationale:

Many low-fi user testers were confused between the Stitch now and ‘+’ button, so we put the plus button at the bottom, similar to other apps to post on the non-AI feed, with an explanation for stitch now in the message feed.

Design Change 2:

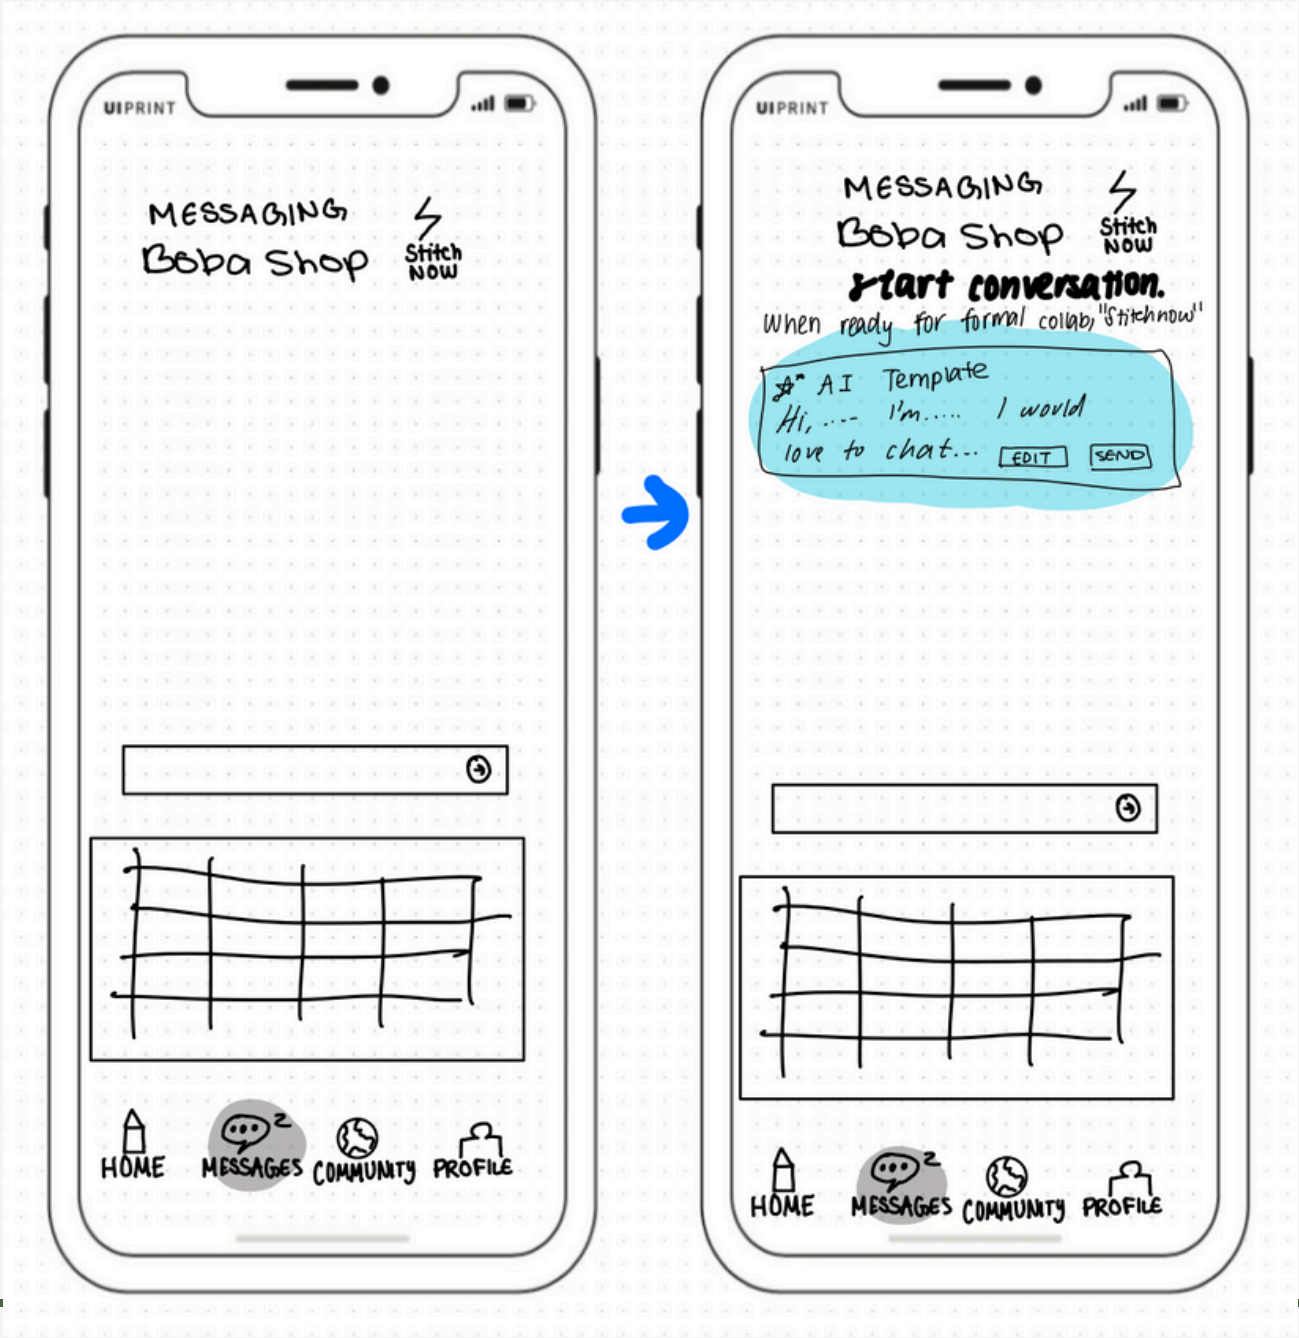

AI-generated auto-text feature

Before:

Feedback:

Design Change 1:

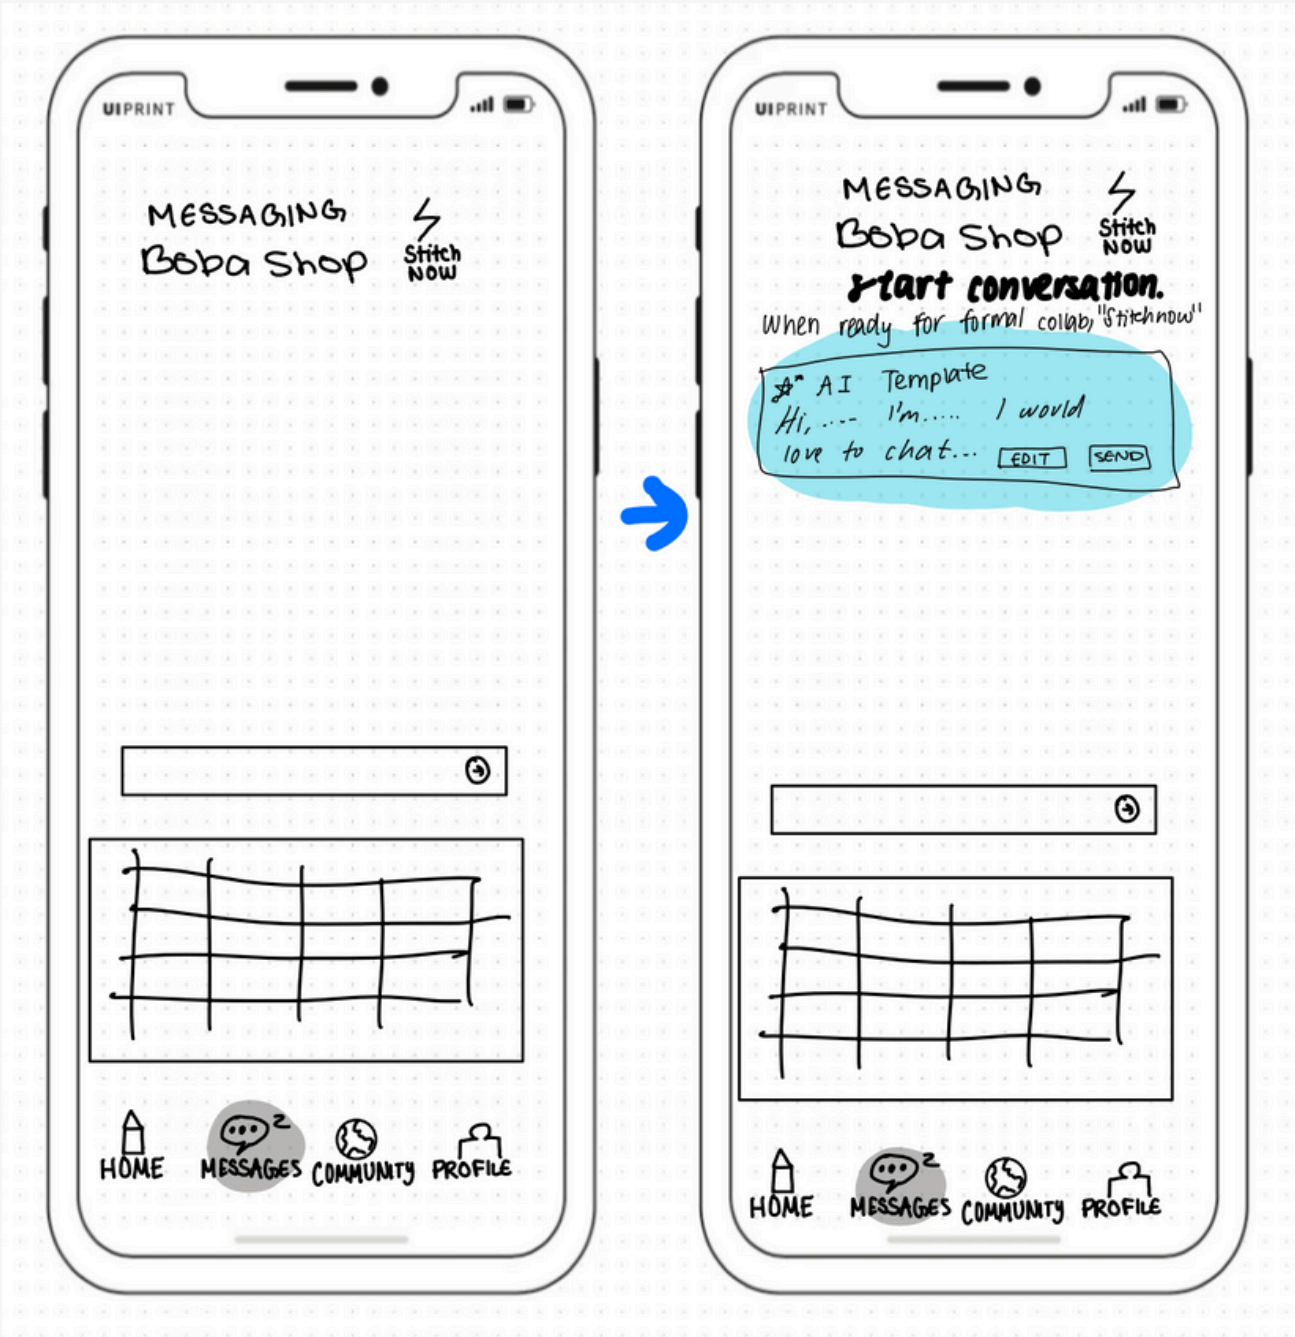

AI-generated auto-text feature

Changes Made:
We created an AI-generated auto-populated message for business owners

Rationale:
This feature saves time for small business owners who want to form collaborations easily and efficiently with the amount of time they have.

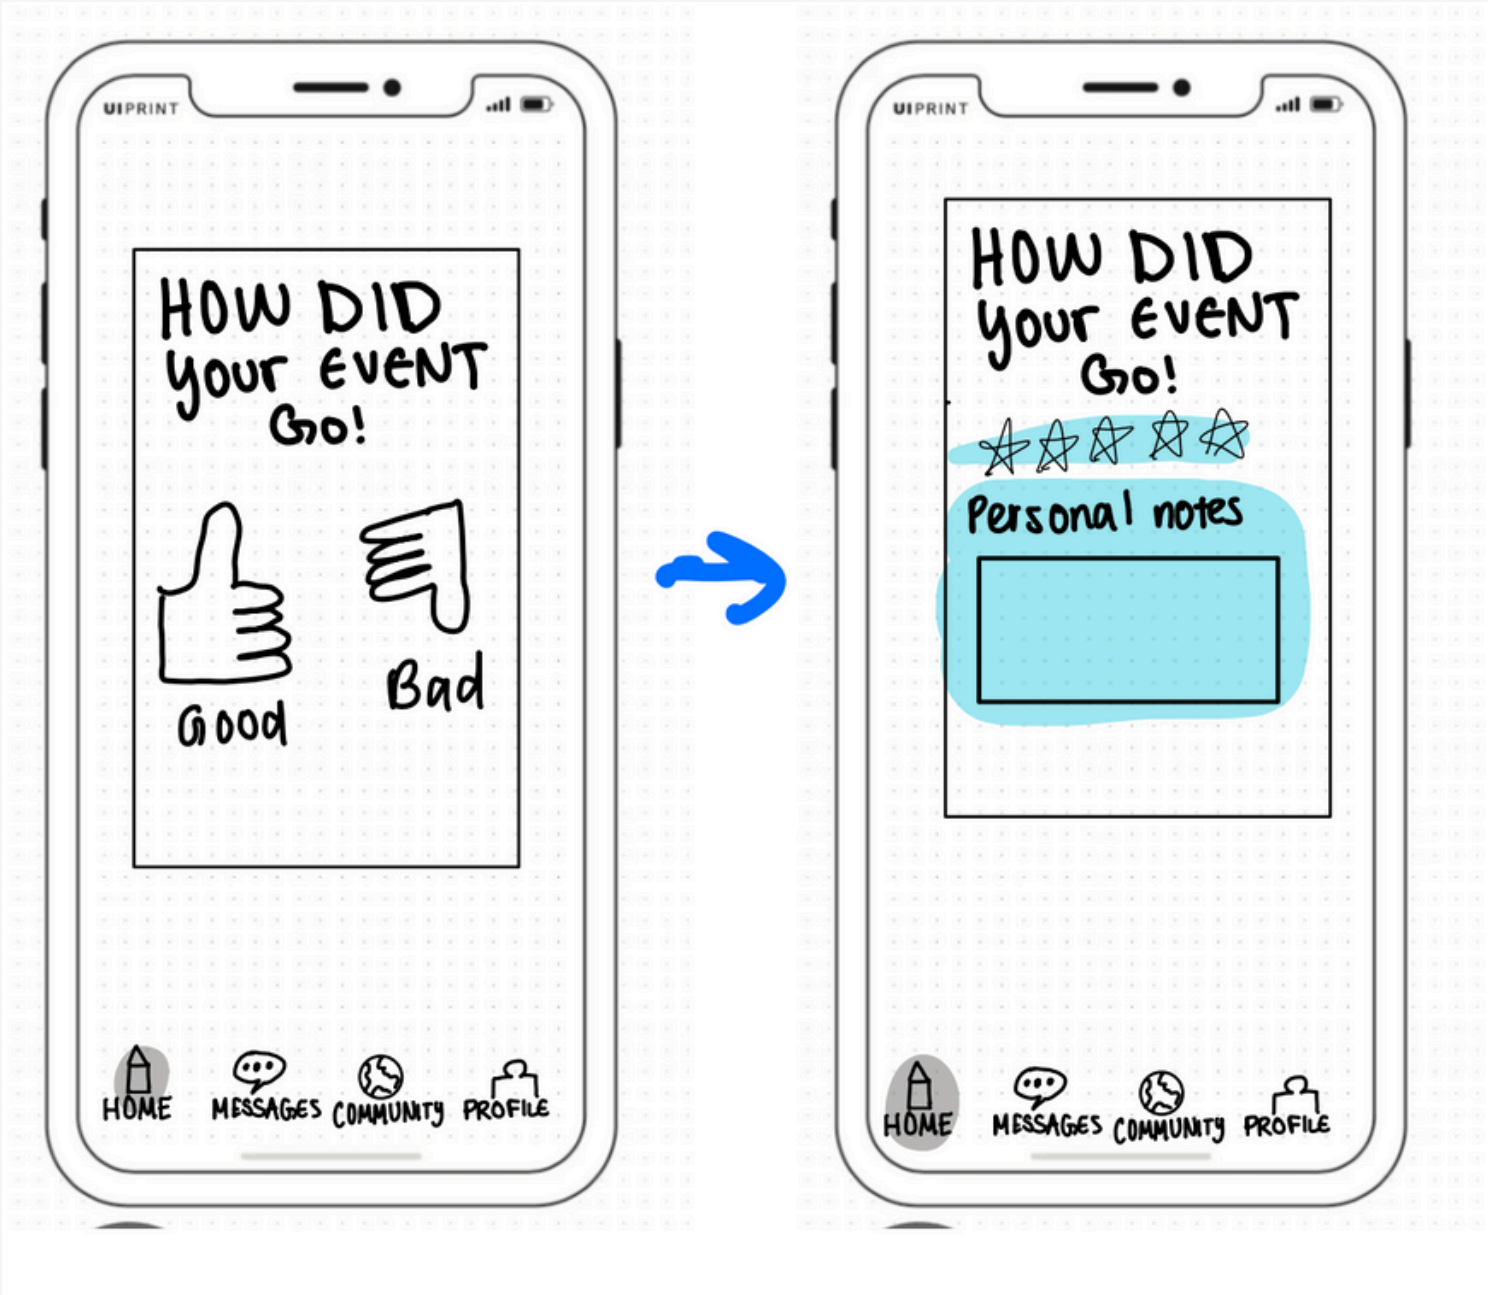

Design Change 3:

Reflection post-event

Before:

Feedback:

Design Change 3:

Reflection post-event

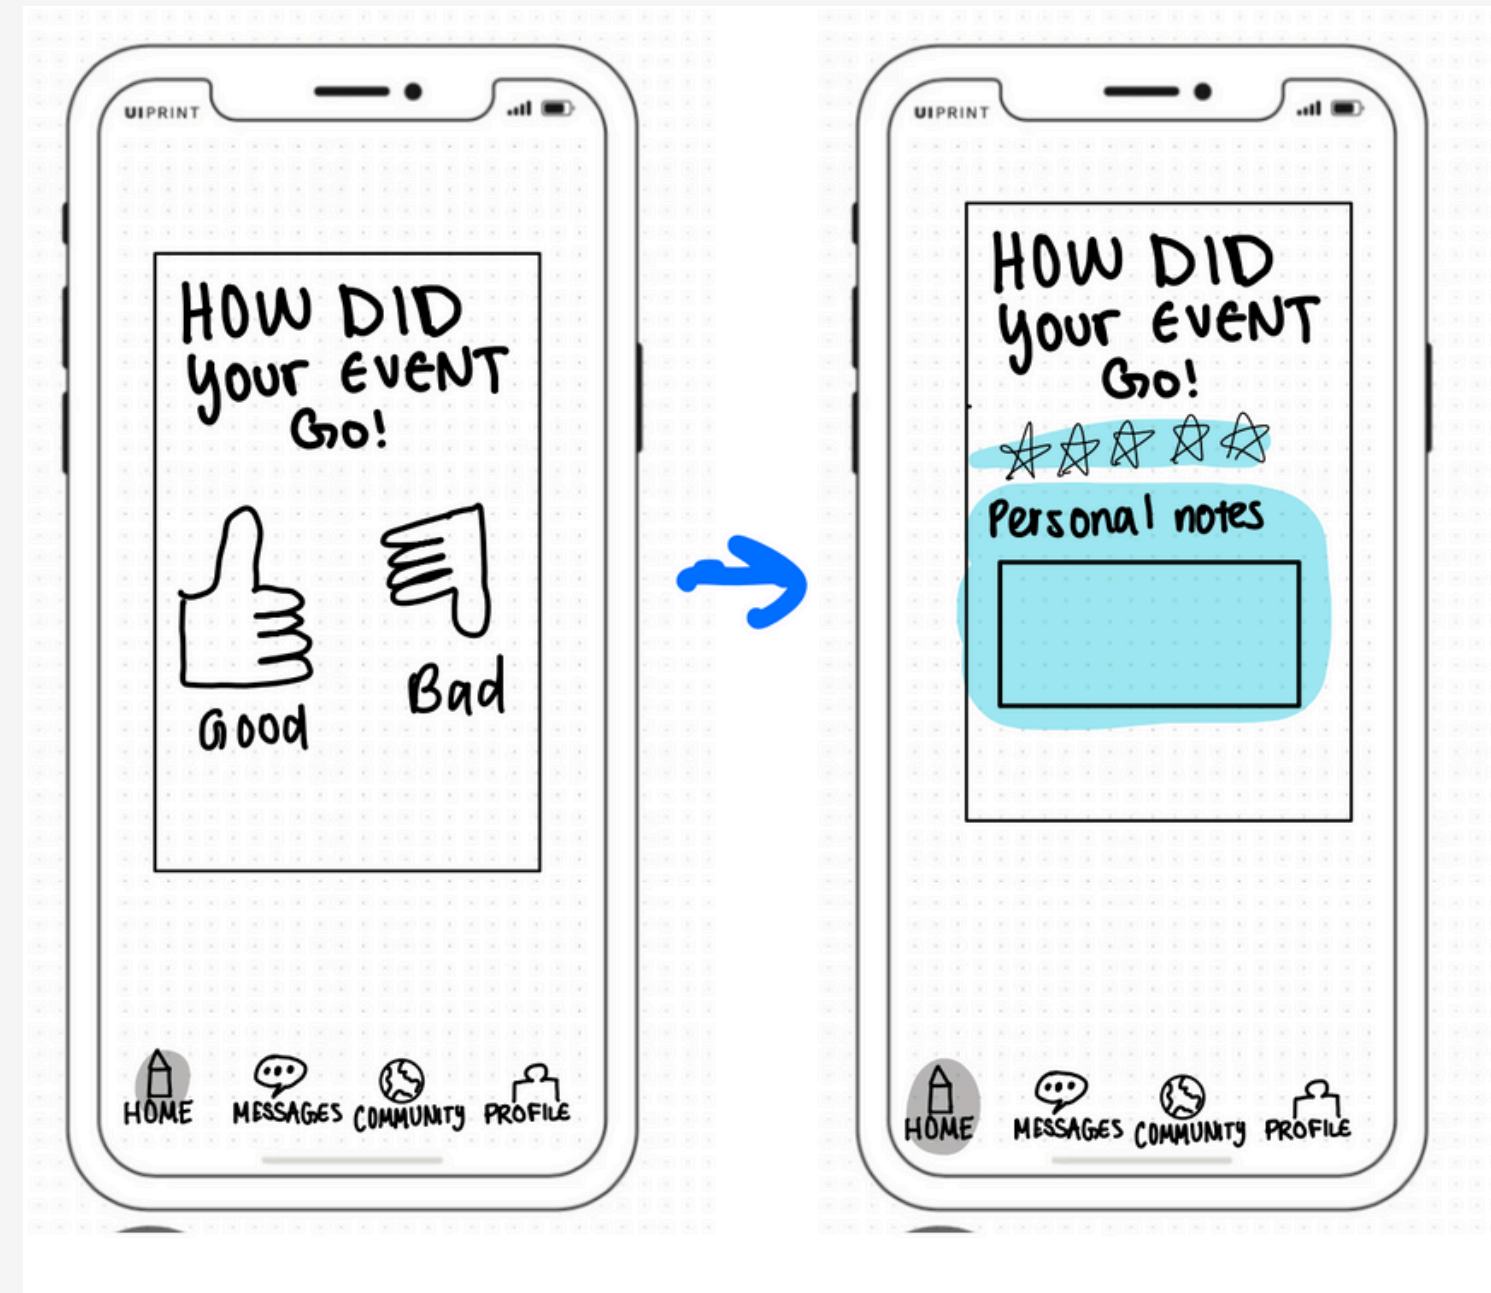

Changes Made:

We added more of a range of feedback for an event. We also added a personal reflection area that only the business owner themselves can access.

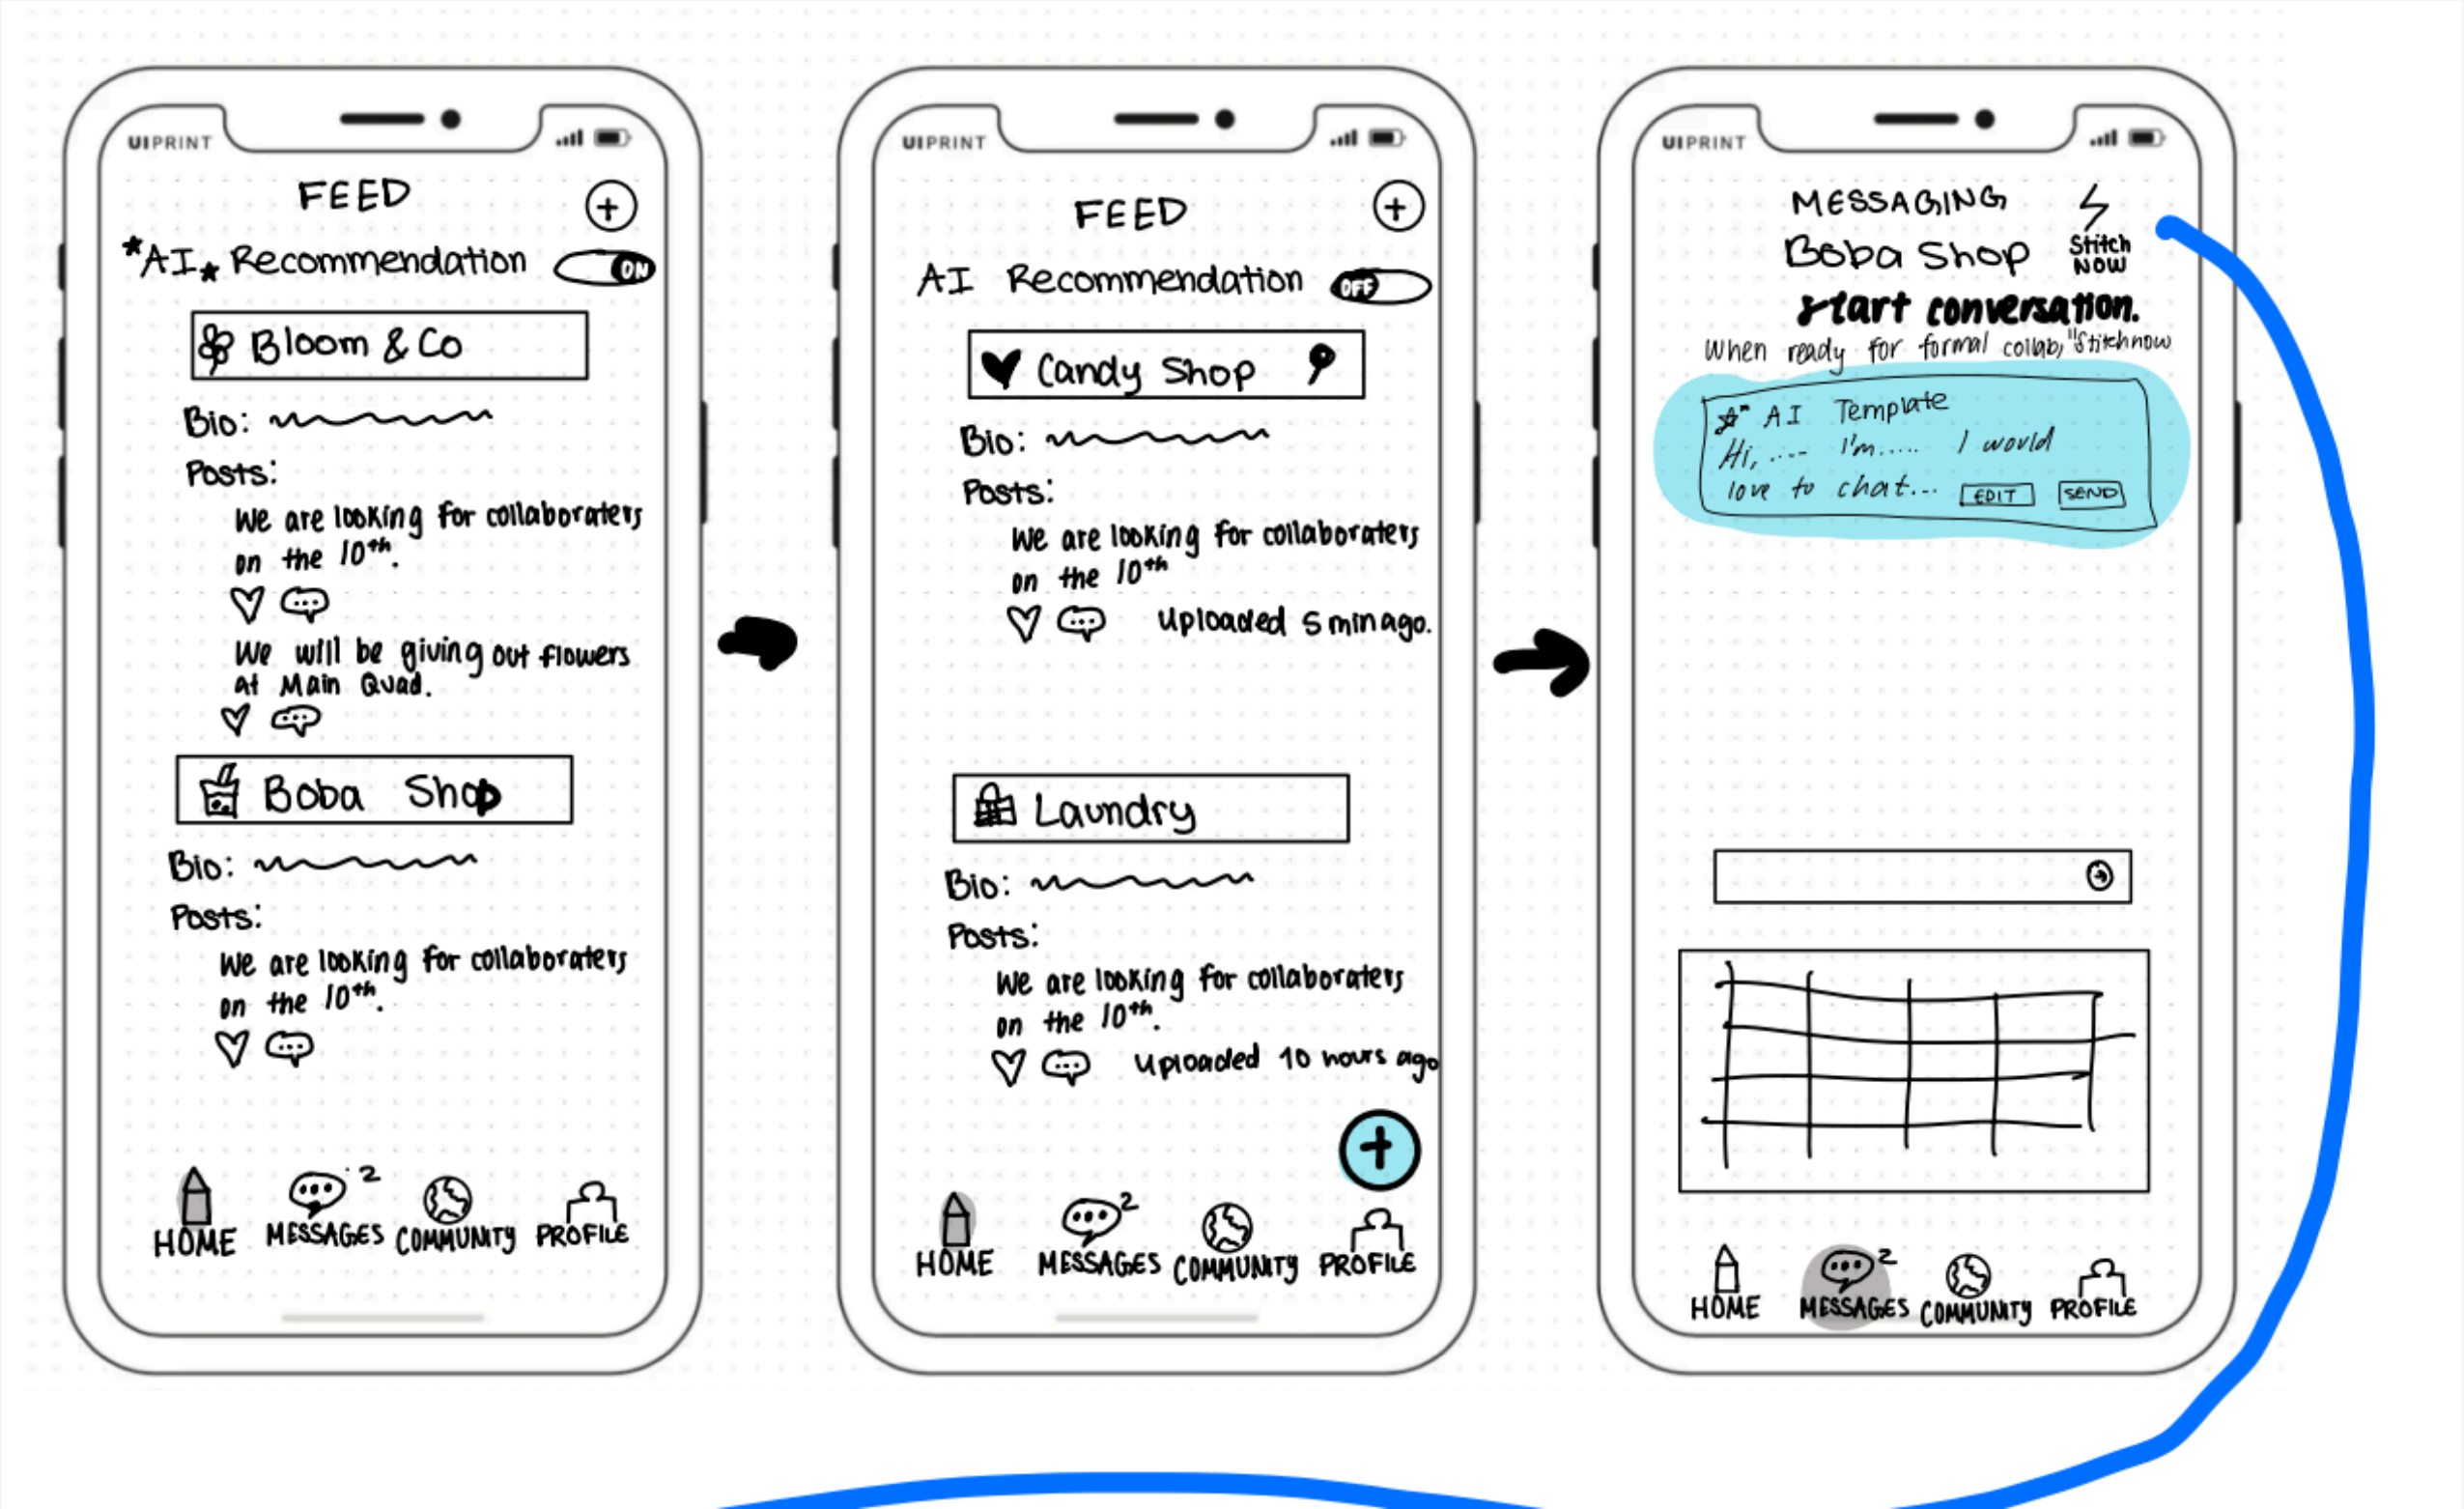

Rationale:

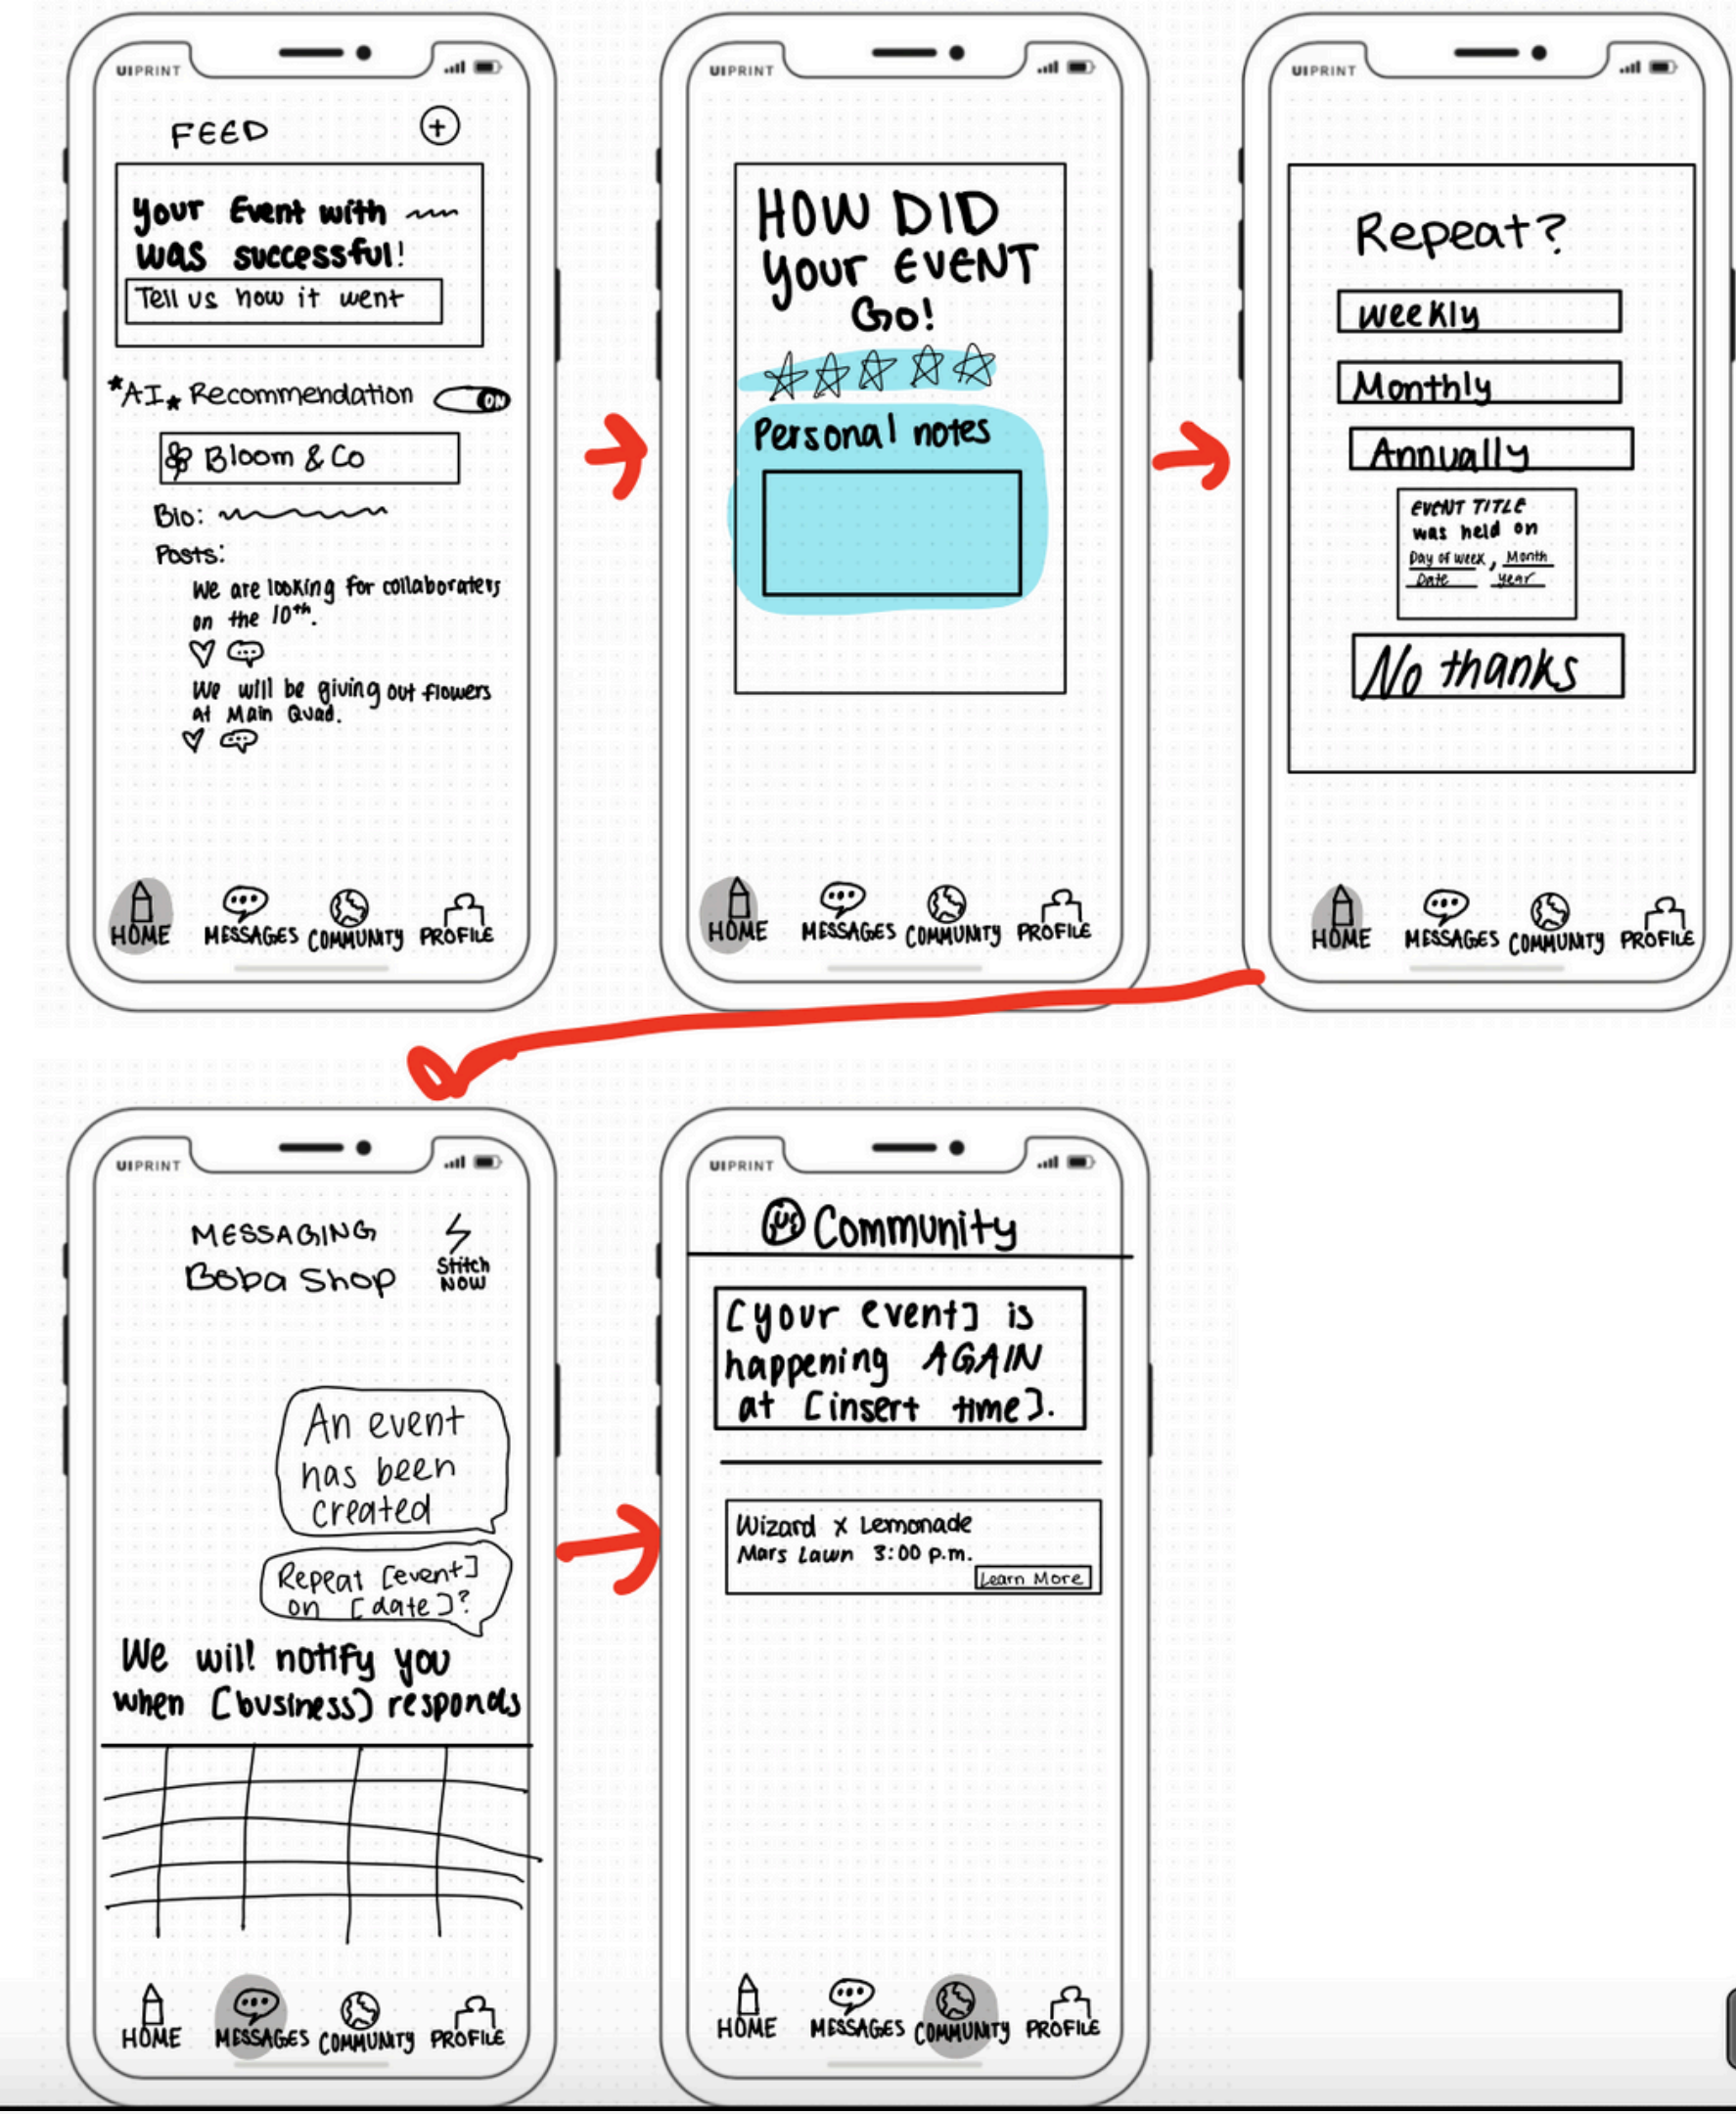

Business owners may want to reflect in the future after the event, and by keeping notes of what worked & what didn't, they may have a much easier time.

Simple Task Workflow

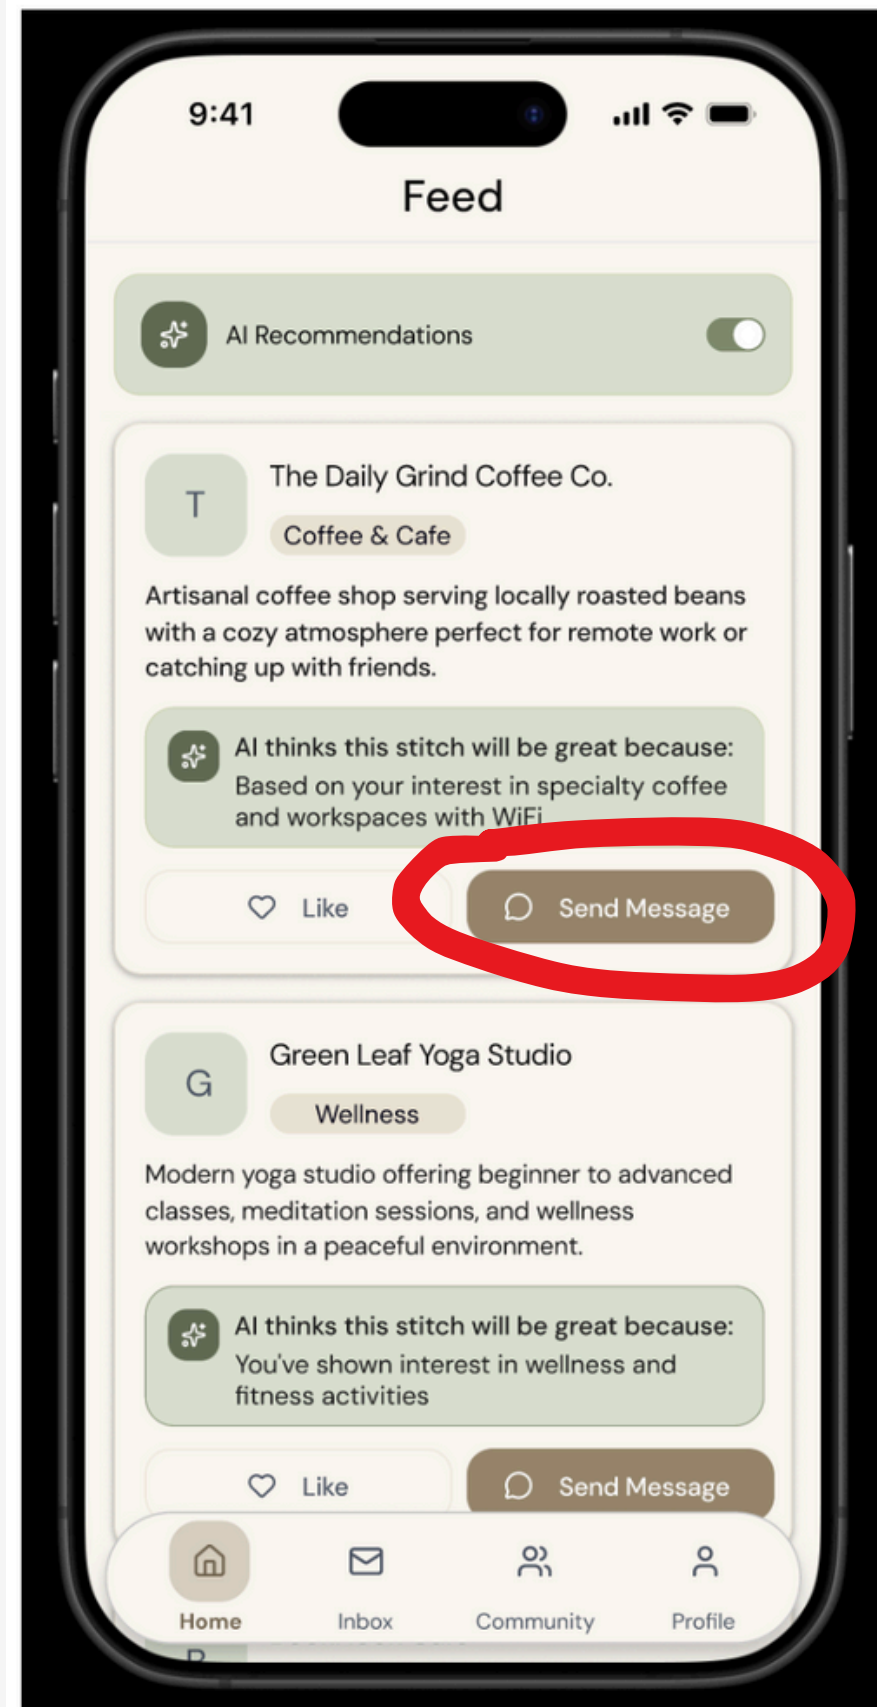

Complex Task Workflow

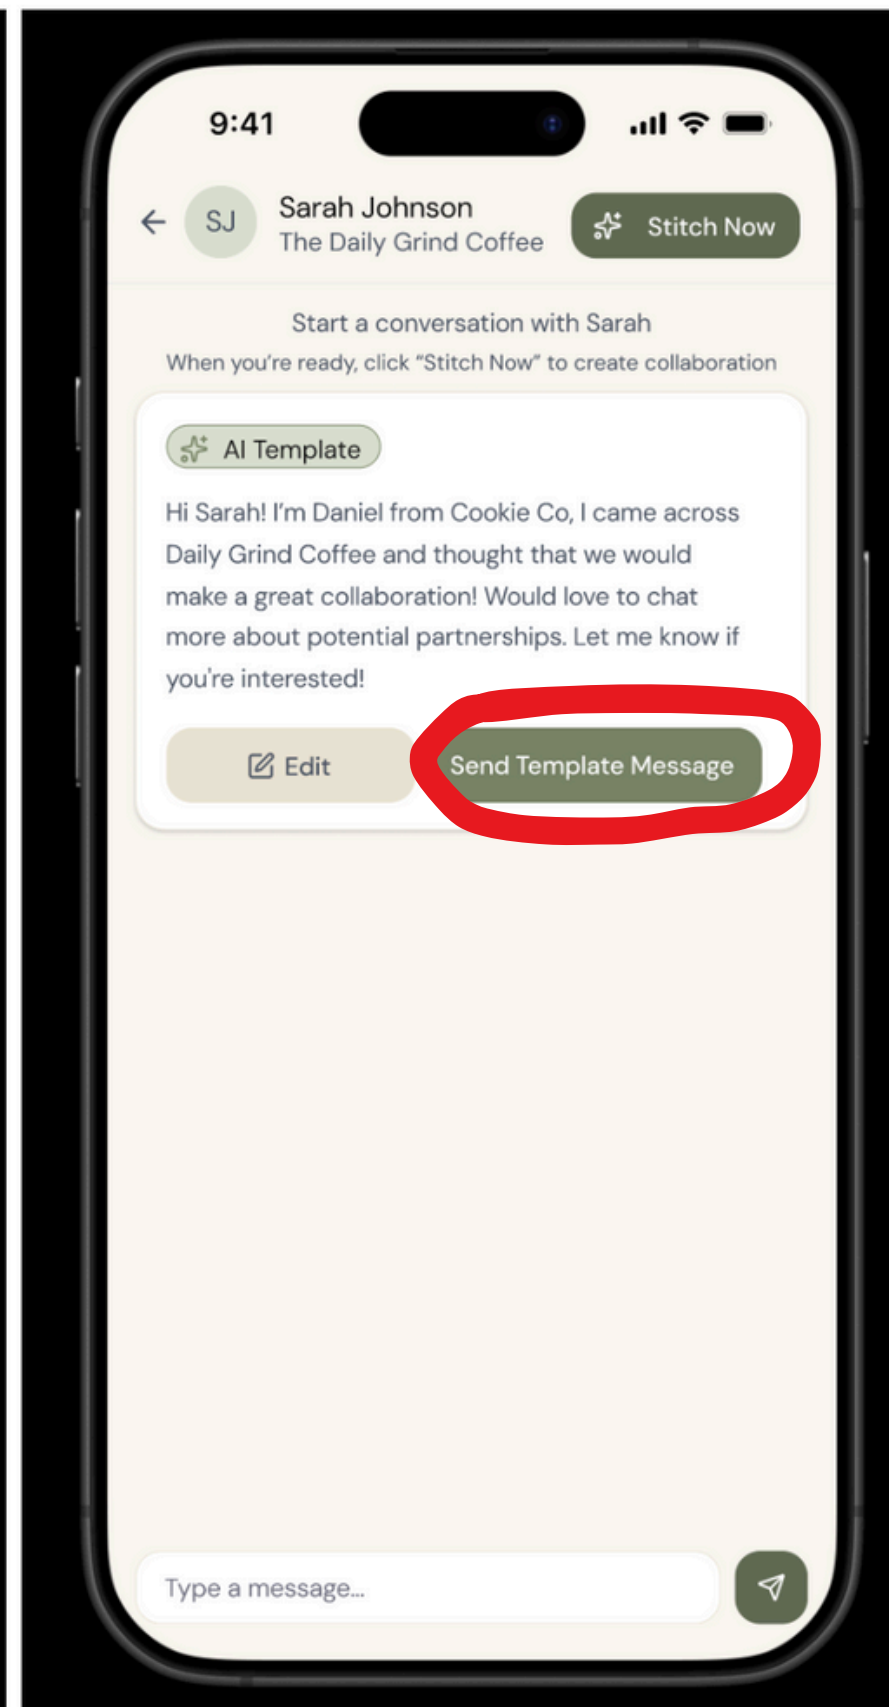

Med-Fi Task Flows

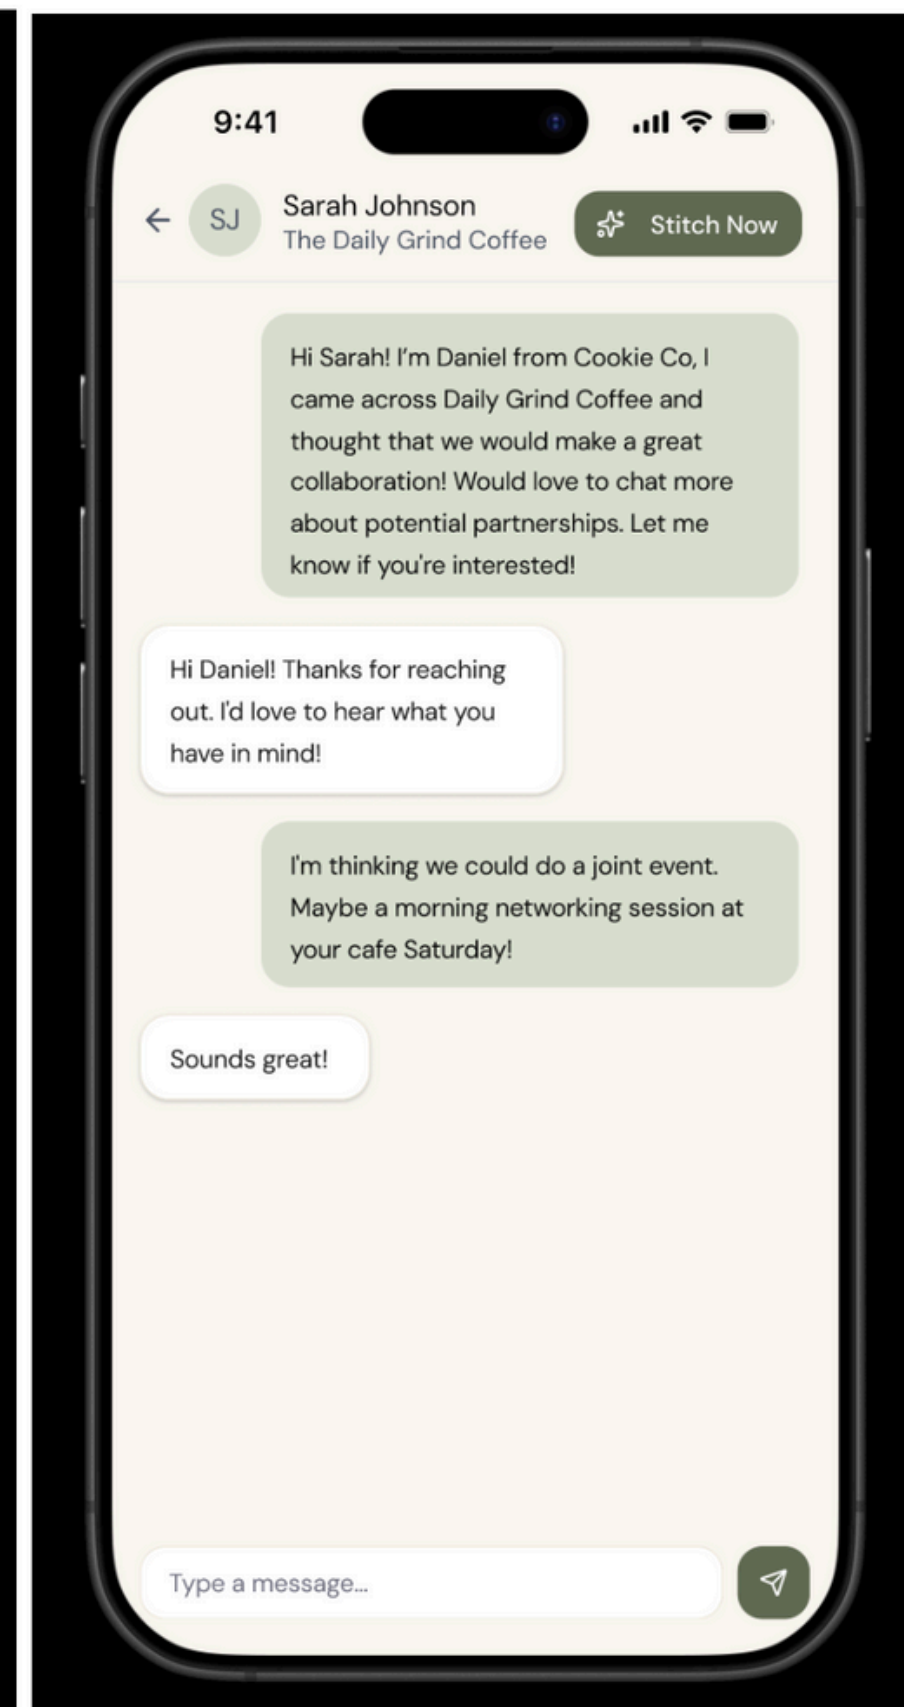

🔍 Simple Task: send a message to collaborate

Click the send message button to one of the businesses you want to collaborate with.

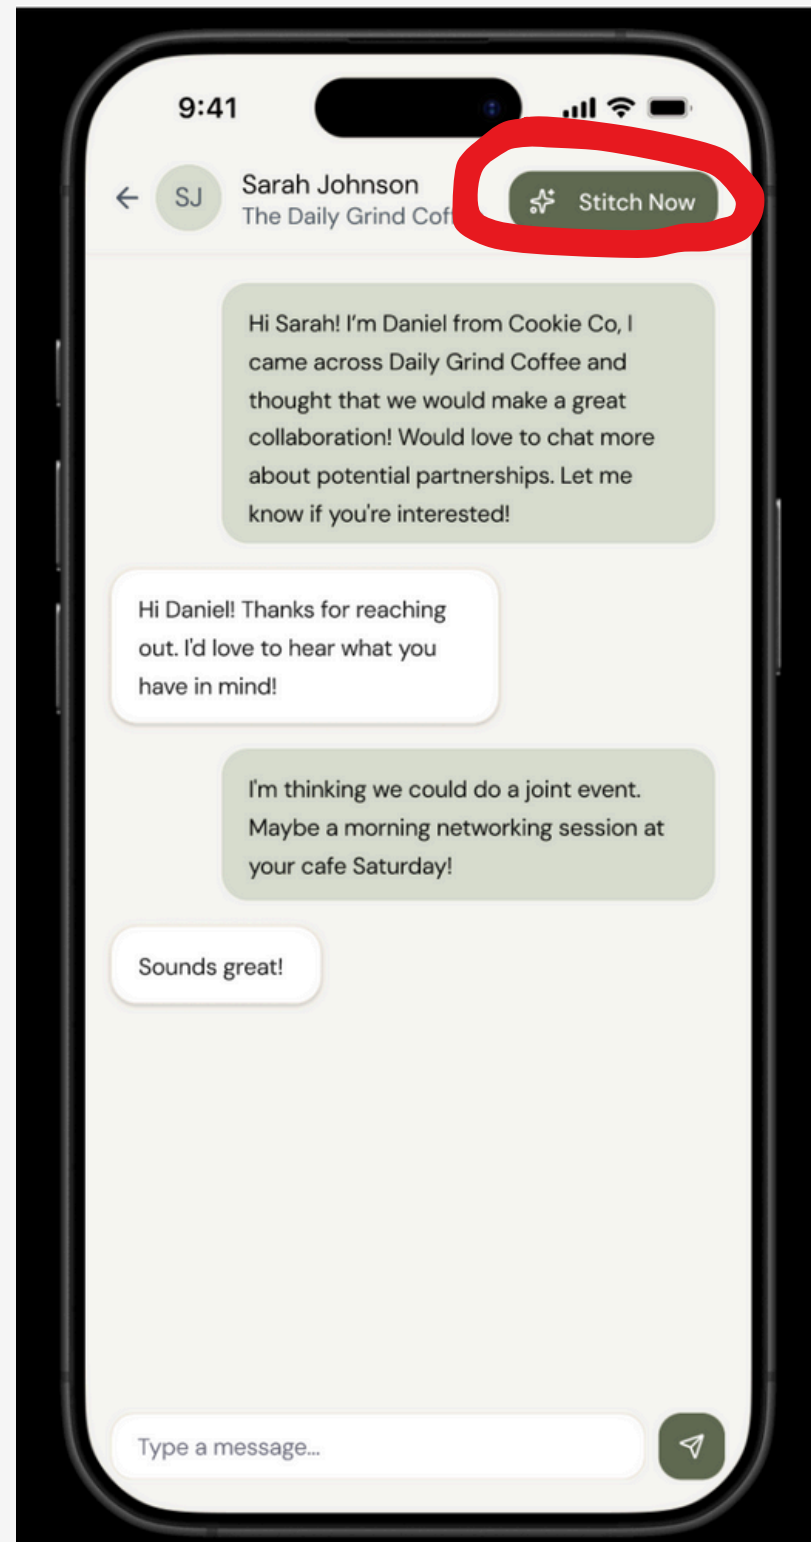

You can choose to send your own message or send the AI-powered message.

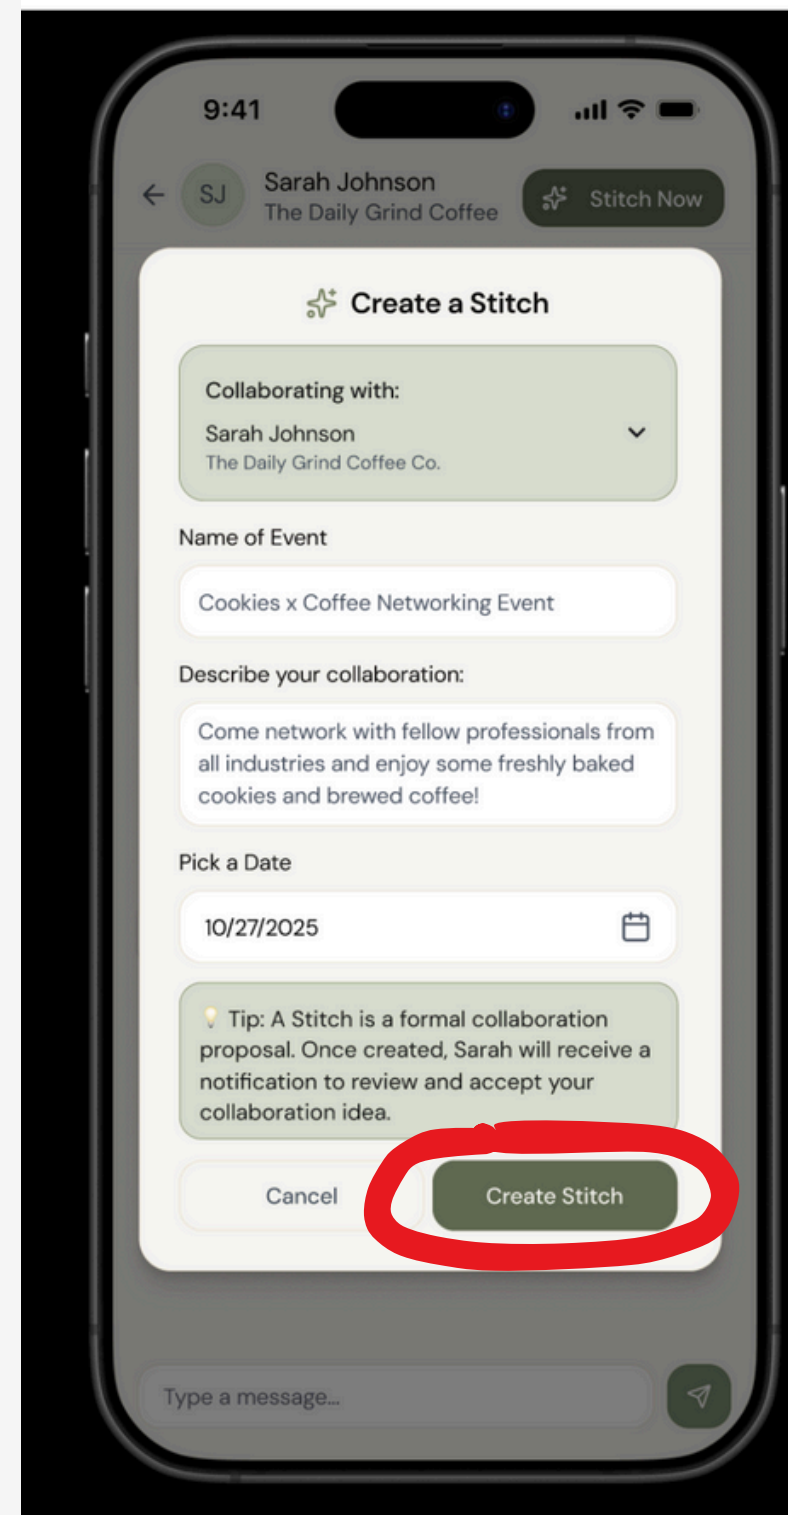

Send message and continue conversation!

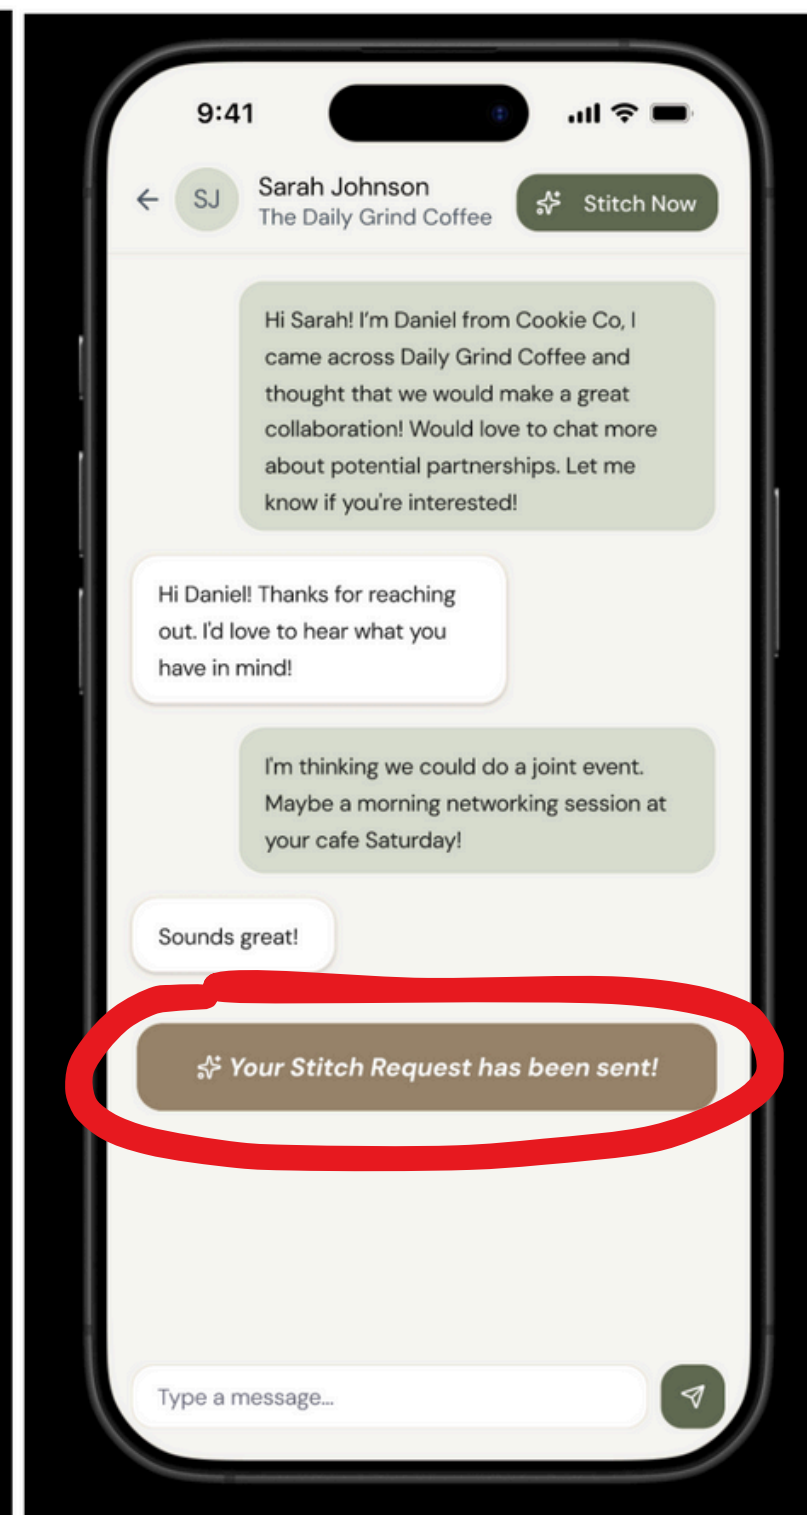

Medium Task: post an event to collaborate

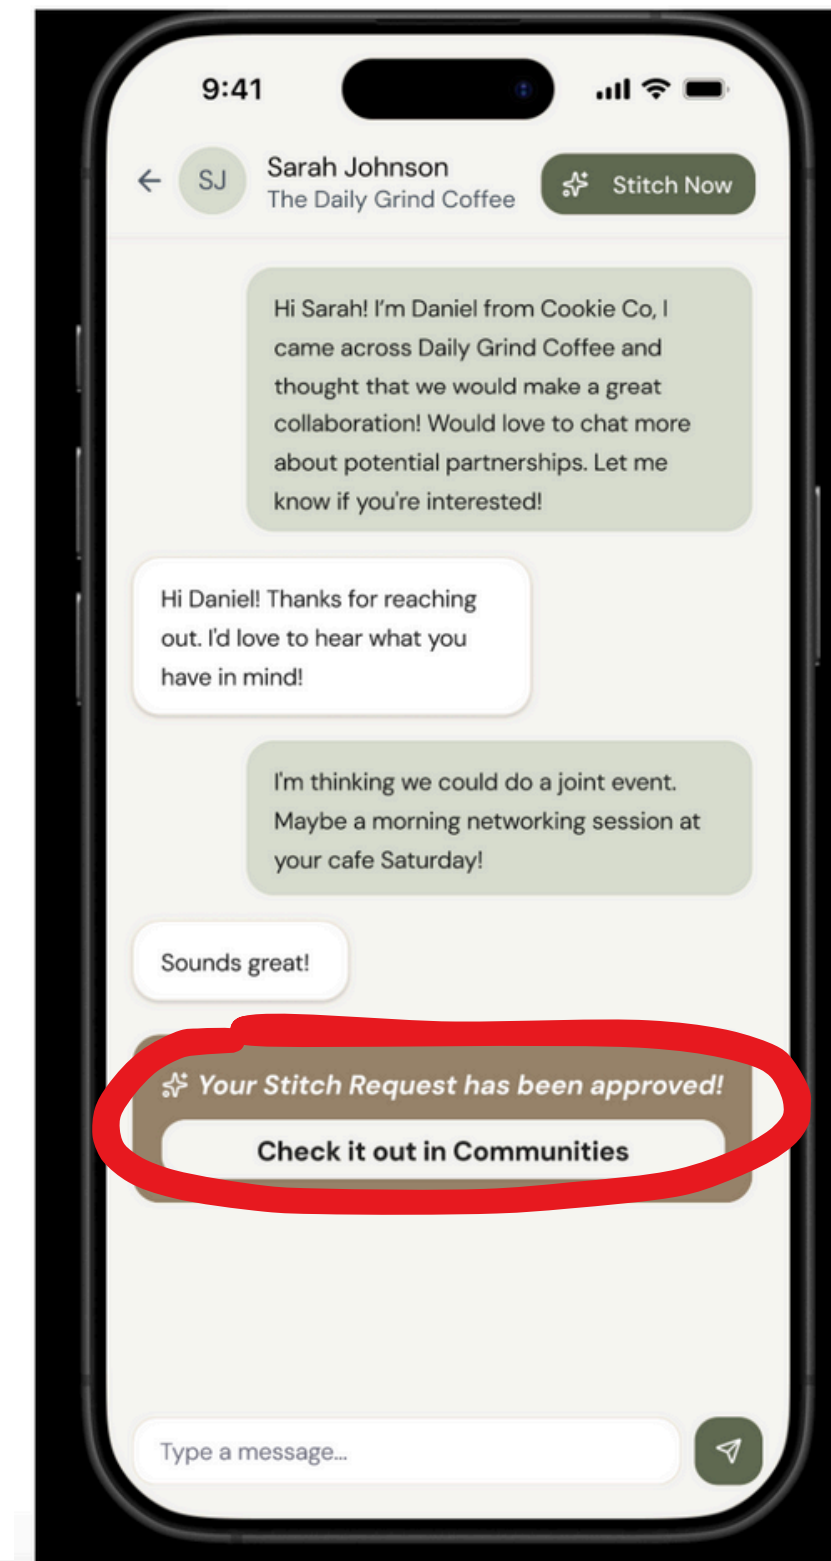

When you have agreed with a business on the event details, you can click Stitch Now and formally upload the event on to the app.

Fill in event details and click Stitch now

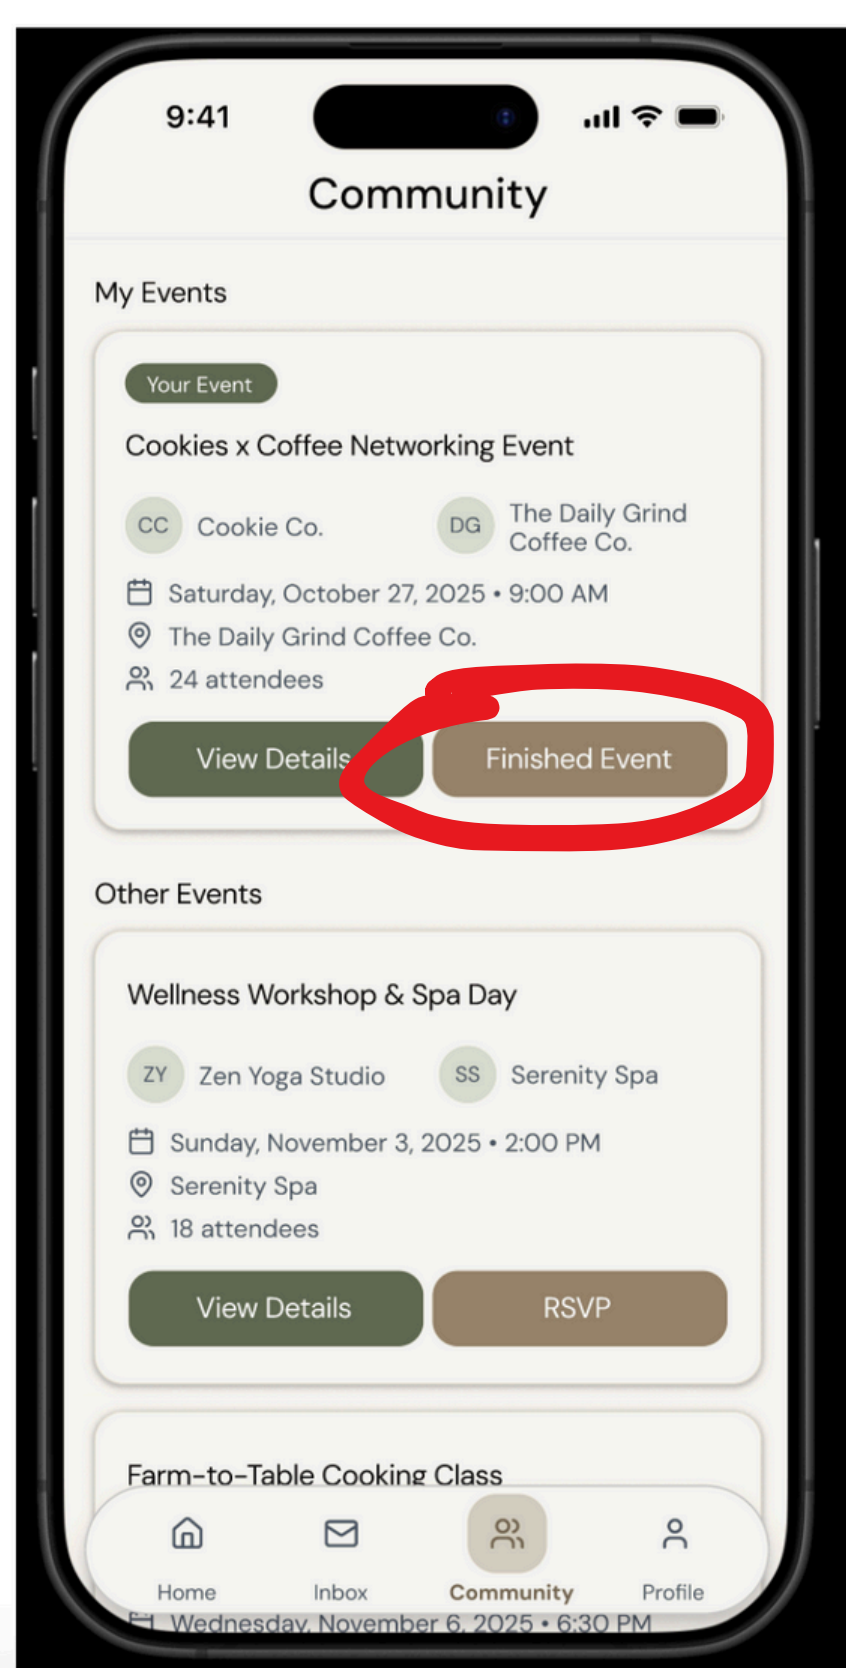

Now, the business needs to wait for approval from co-hosting business to ensure mutual agreement for an event.

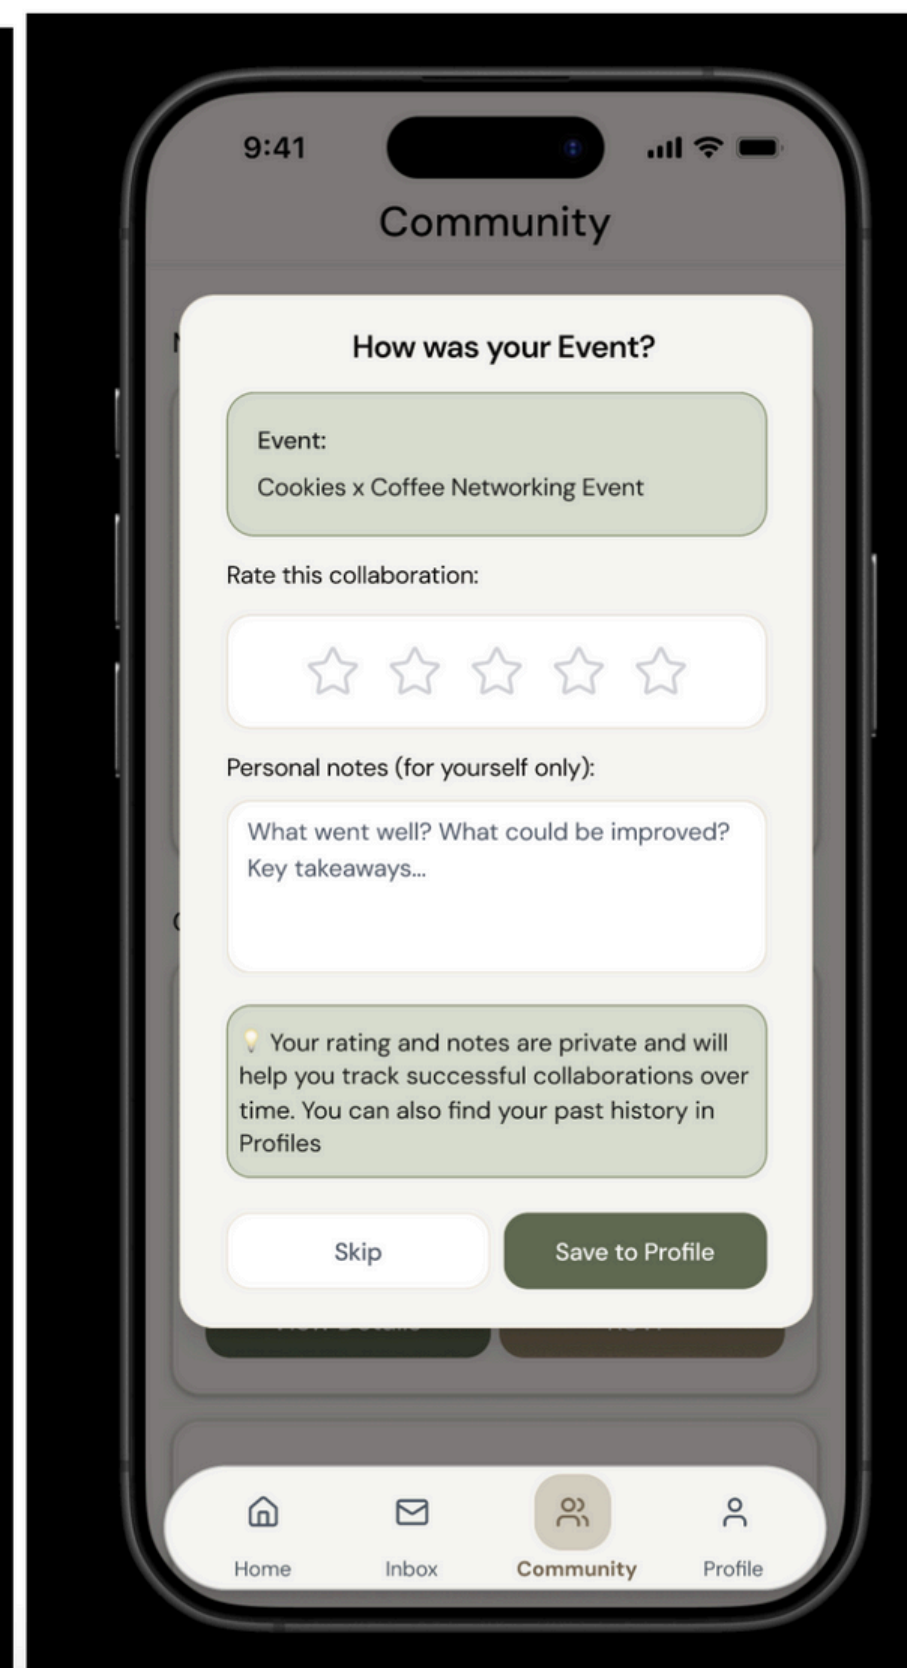

Once the other business approves, the event is automatically uploaded onto the communities page.

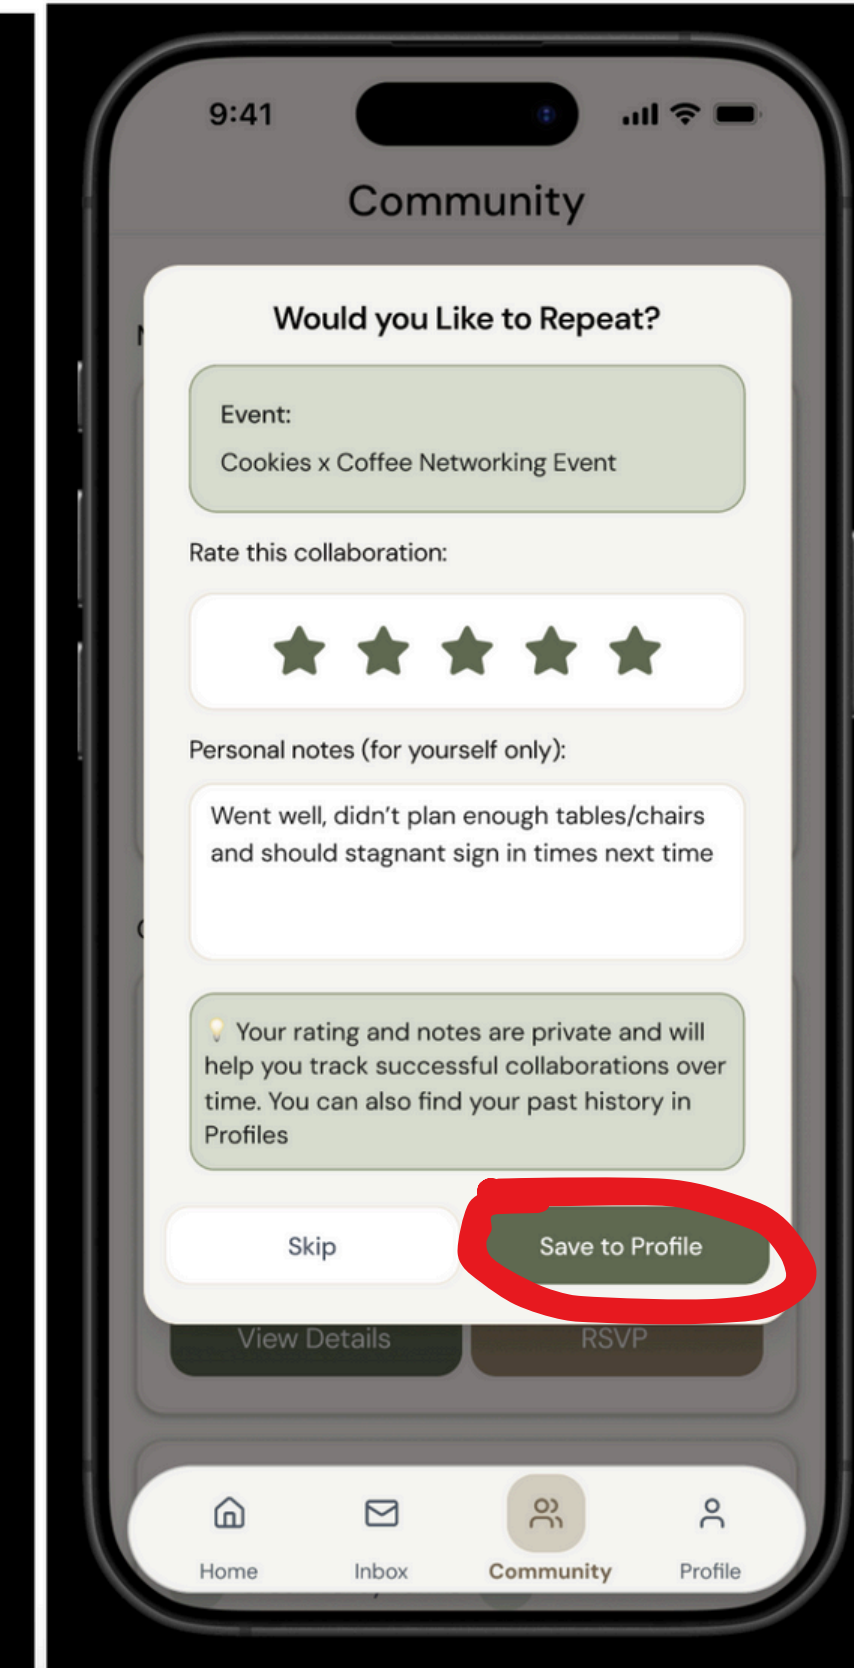

🔍 Complex Task: collaborate on an event multiple times

When event is finished, click finished event.

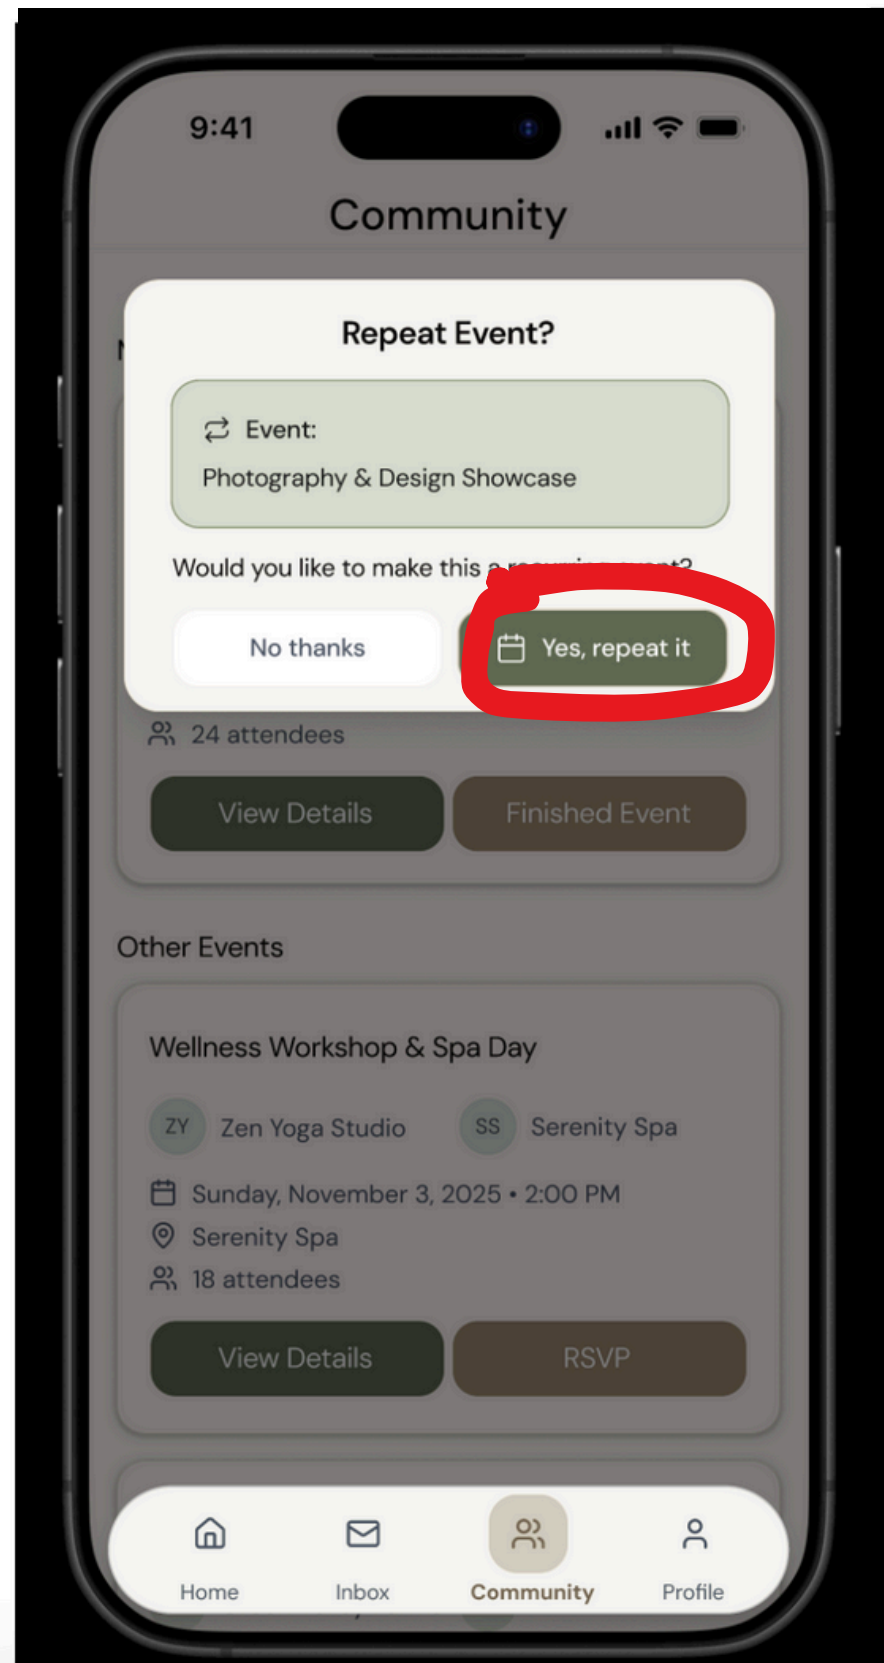

Fill in details post-event collaboration.

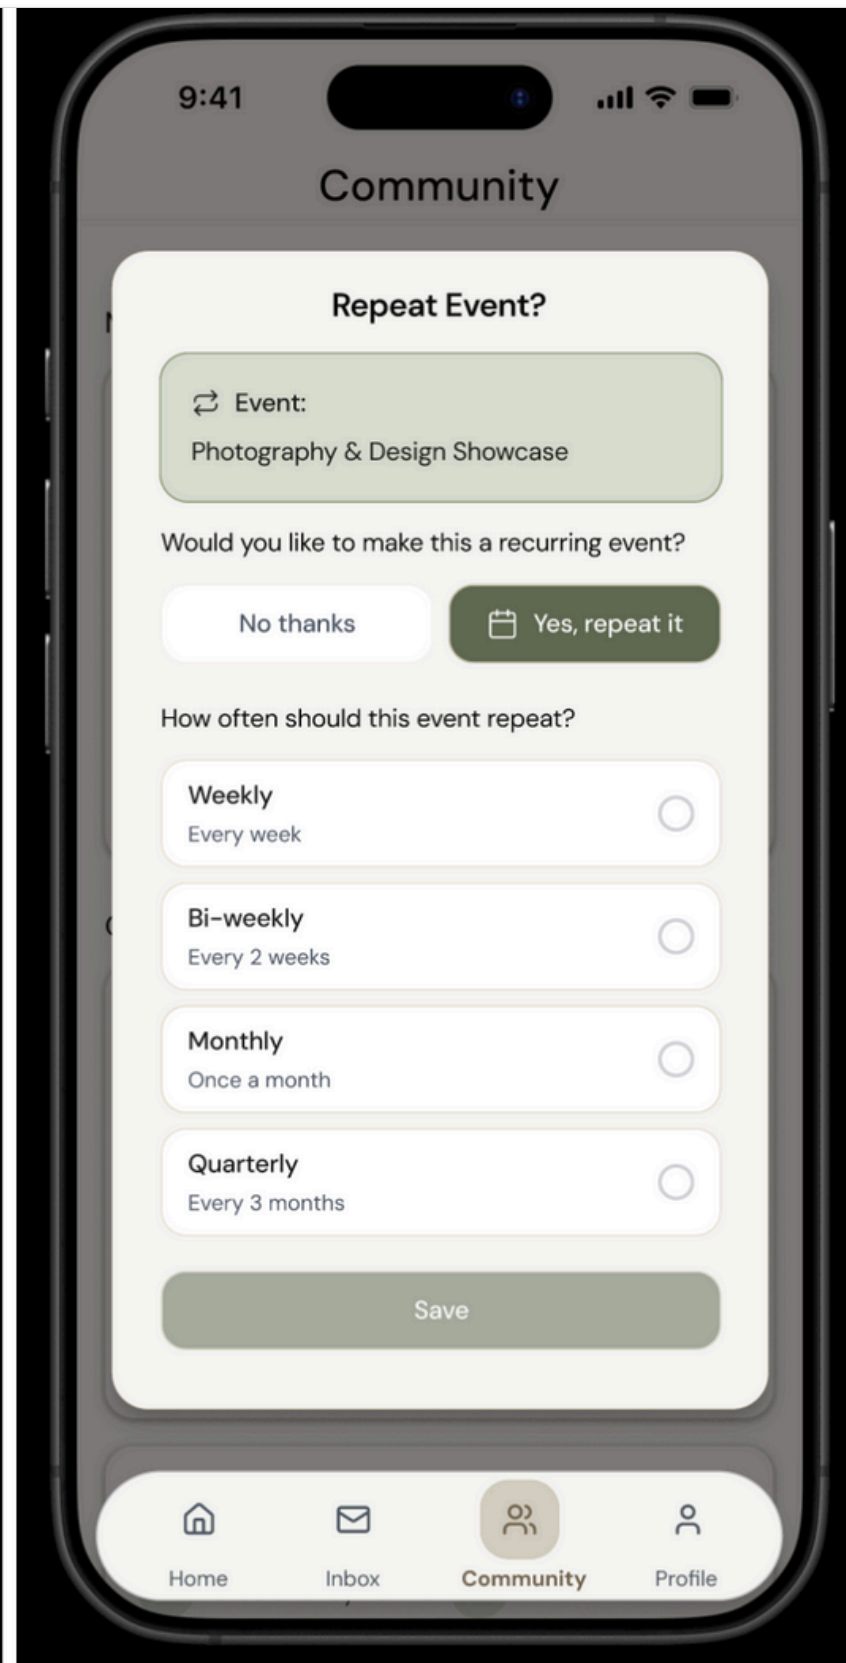

Save post-event details.

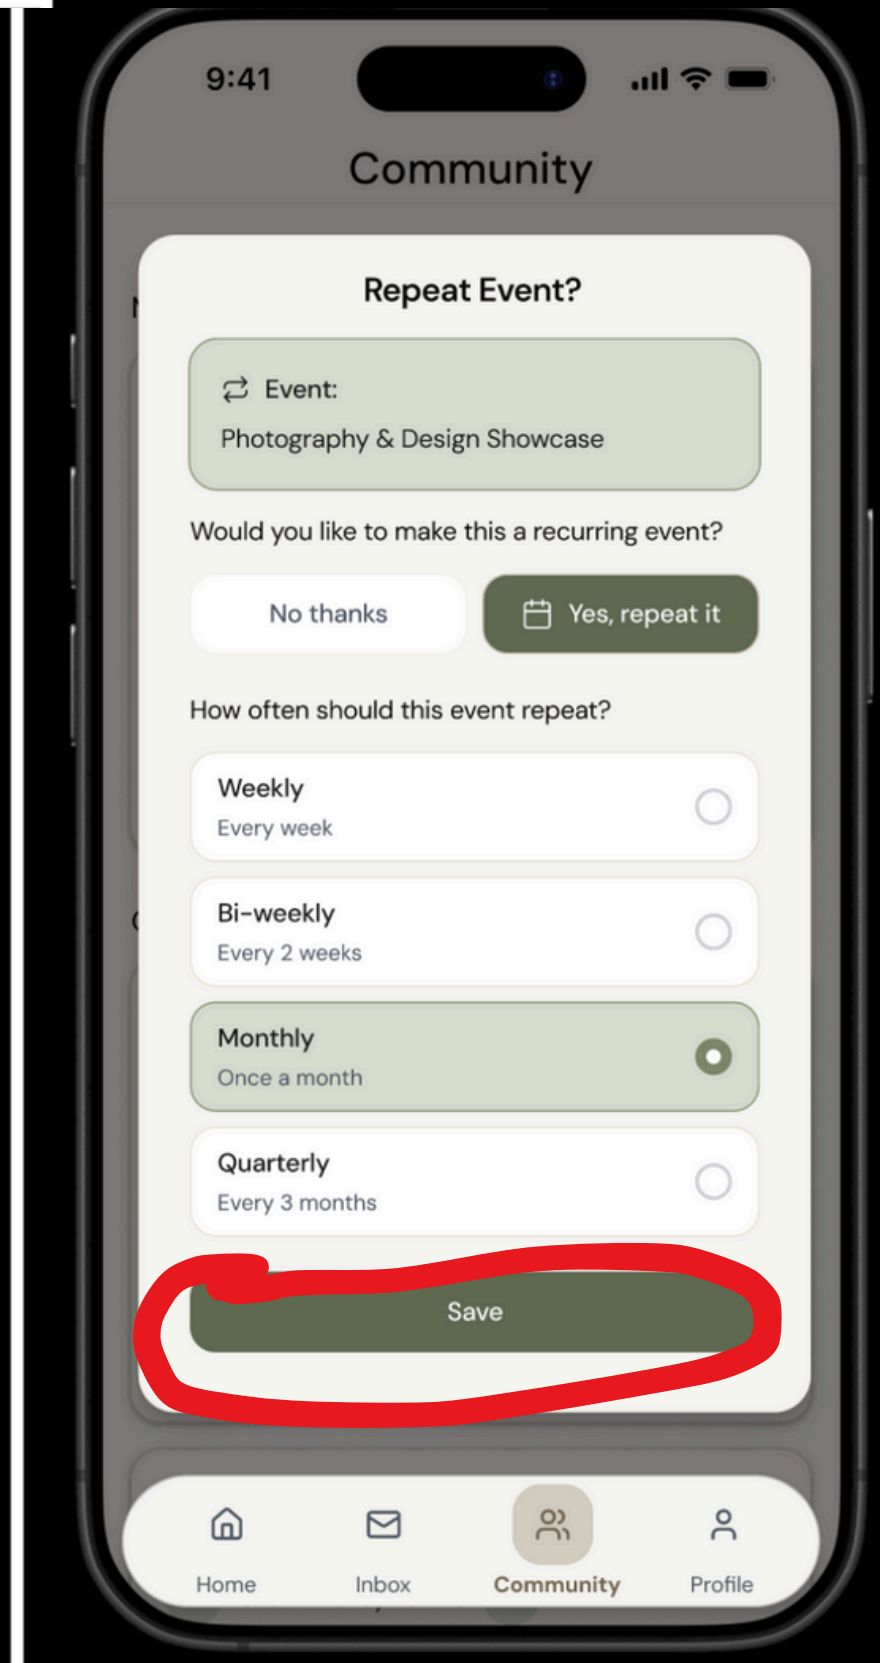

Complex Task: collaborate on an event multiple times

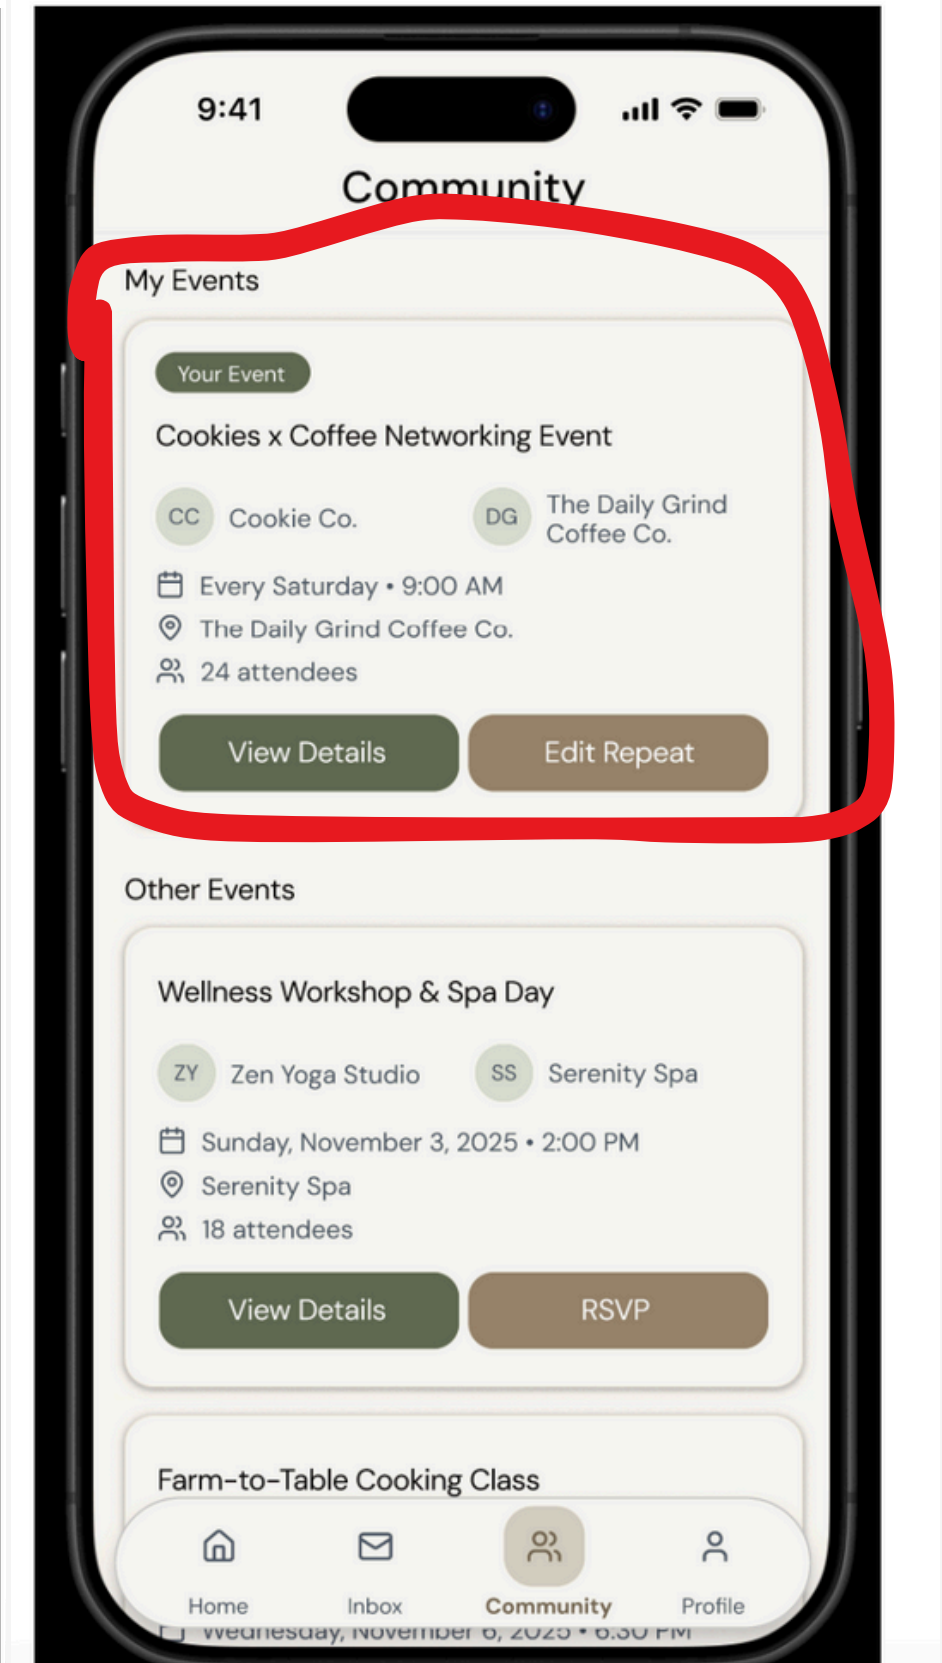

If a business owner wants to repeat an event,

They can fill in information

Then save the repeated information.

Prototype Implementation Tools

PROS:

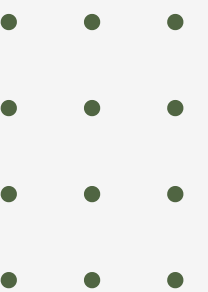

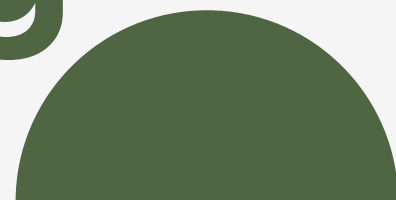

Speed because no learning curve,
easy to use, erase
Natural ideation as it mimics paper
sketching allowing fluid
brainstorming.

CONS:

No interactivity and hard to simulate
actual taskflows without getting messy
Limited Collaboration as only one person
can draw at a time unlike Figma where
multiple people can work on the same
component.

Notability

PROS:

Real-time collaboration because multiple team members can design, comment, and iterate simultaneously.

Interactive prototyping - can create clickable flows with transitions, animations, and realistic interactions

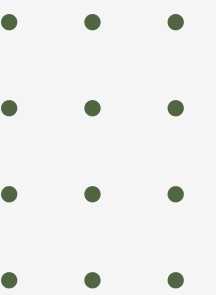

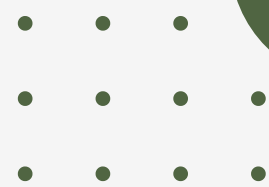

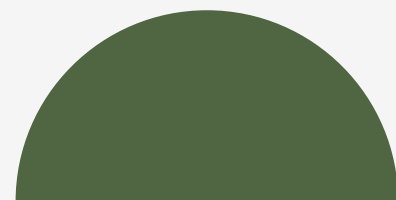

CONS:

learning curve - requires familiarity with Figma's interface, components, auto-layout, and prototyping tools

Overthinking details - Easy to get distracted by visual polish (colours, fonts, pixel-perfect spacing) before validating core flows

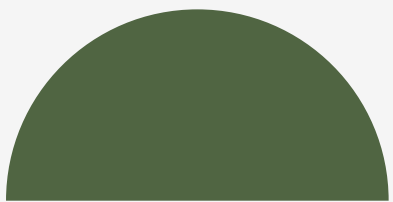

Figma

Limitations & TradeOffs

Limitations & TradeOffs

The prototype emphasizes testing core user flows ie, partner discovery, messaging, and event creation, rather than full-feature completeness.

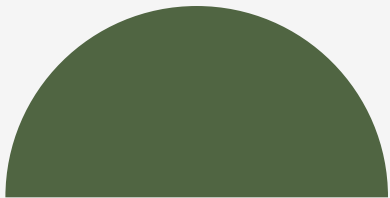

Several components, like the Profile tab, the like button, and edit event functionality, are non-functional and will be developed later.

Features like media uploads, editable AI messages, and open date pickers are excluded to keep testing focused and manageable.

Wizard Of Oz Features

Autopopulated message conversations

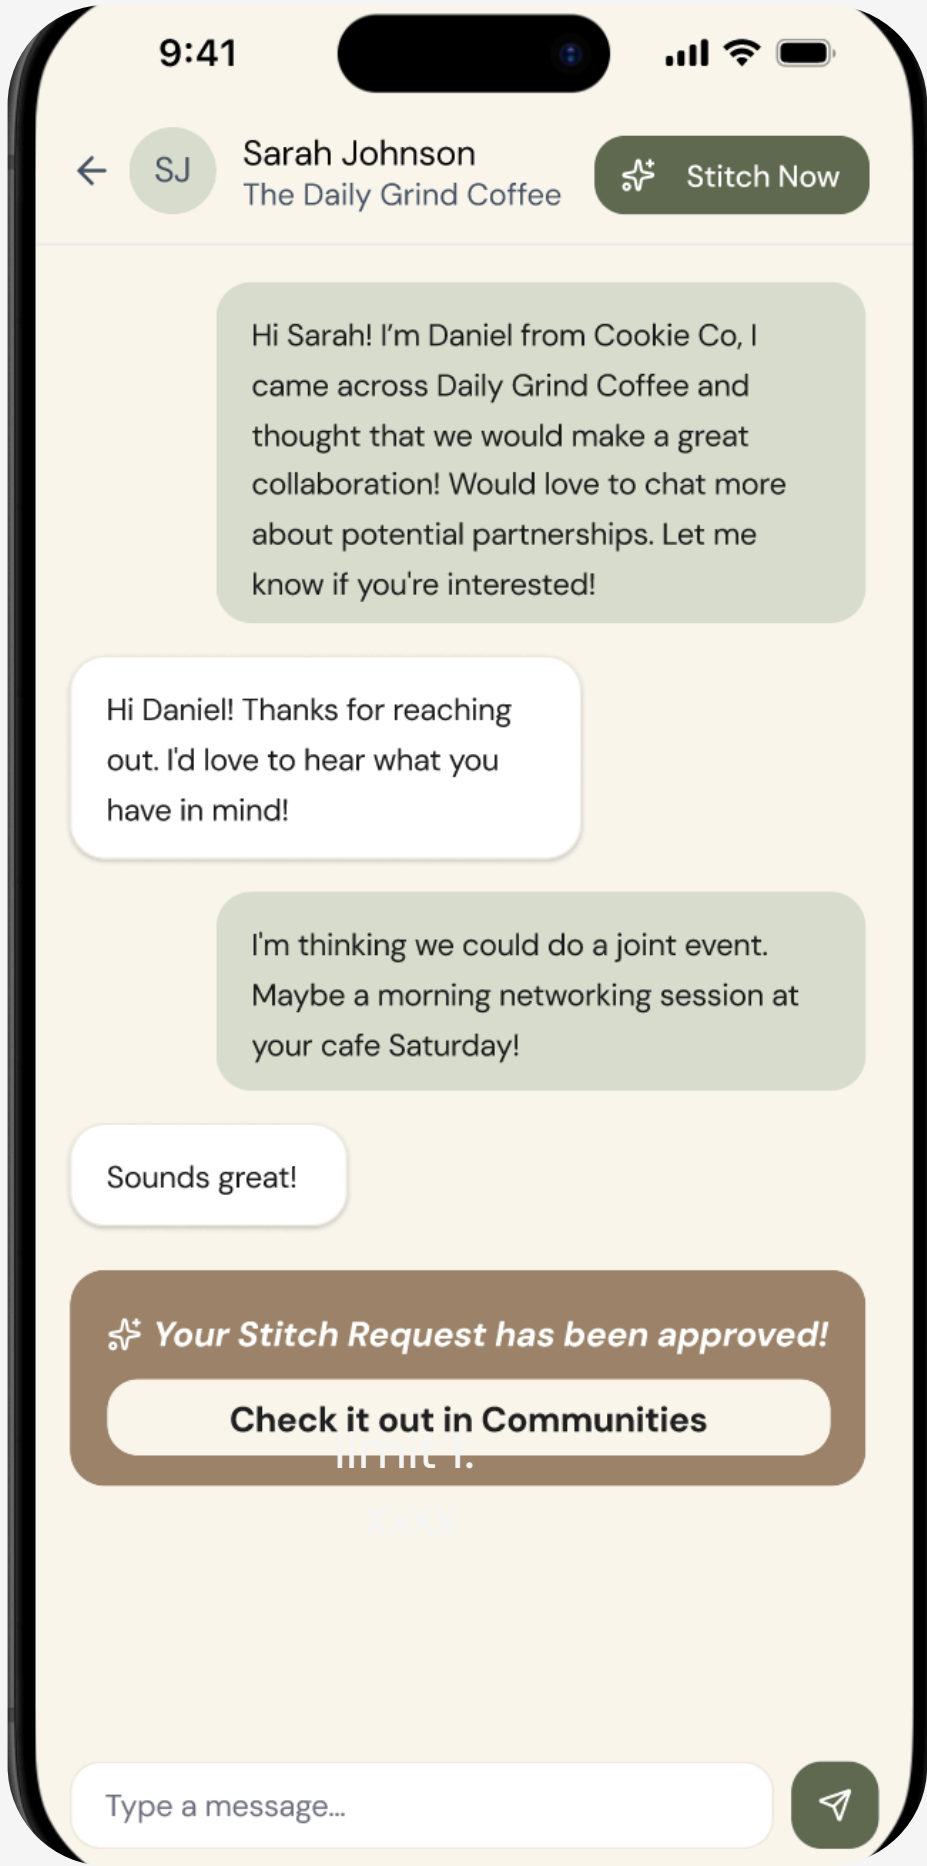

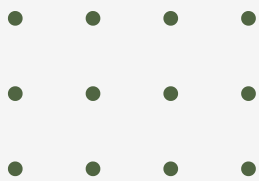

Automated “Stitch Approval” Message after 800ms

Pre-selected Dates in Date Picker(Only October)

Instant Community Events Updated to add the new ‘stitched’ event.

Hard-coded features

Hi Sarah! I'm Daniel from Cookie Co, I came across Daily Grind Coffee and thought that we would make a great collaboration! Would love to chat more about potential partnerships. Let me know if you're interested!

Hi Daniel! Thanks for reaching out. I'd love to hear what you have in mind!

I'm thinking we could do a joint event. Maybe a morning networking session at your cafe Saturday!

Sounds great!
